About Orders, Shipping, Etc.

The prices quoted in this list do **not** include cost of delivery, which must be paid by the purchaser. We make no charge for bags, boxes, or packing.

Parcel Post

Parcel post rates are very low to places within 150 miles of Rochester. Only 1c per pound after the first pound which is 5c.

The following tables give the rates to different parts of the country:

		Each			Each
		Additional			Additional
		1 lb. lb.			1 lb. lb.

When ordering seeds sent by parcel post please add enough money to the price to cover the necessary postage which we shall have to pay.

BY EXPRESS. The express rates are now a little lower than parcel post on all lots weighing 50 pounds or more. On smaller packages parcel post is cheaper. Express charges need not be prepaid, but parcel post must be.

BY FREIGHT. Lots weighing over 100 pounds will go cheaper by freight than by express, but it takes longer for freight to get through. If seeds are wanted immediately and you are willing to pay the extra cost it is best to have them sent by express.

Please state on your order whether you wish the seeds sent by parcel post, express, or freight. If ordered by parcel post please add to the amount remitted enough to pay postage.

CONDITIONS OF SALE. We agree to assume the responsibility of the seeds and plants we sell reaching the purchaser in good condition, and should any seeds fail to grow under favorable conditions, or prove not true to name or of inferior quality, we will **REFUND THE MONEY PAID FOR THEM** or replace them without charge, but all our seeds and plants are sold on the distinct understanding and with the agreement by the purchaser that we will not be liable for any loss or damage that may occur by reason of the failure of seeds or plants to grow or to be of the variety or quality offered. We will not accept or fill orders on any other terms. **JOSEPH HARRIS CO.**

TERMS. Our regular terms are cash with order, less a discount of 2 per cent, except Grass seeds, Potatoes and Onion sets, on which no discount can be allowed. We should, however, be glad to open accounts with any gardeners of established credit, or who will furnish us satisfactory references. On such accounts all bills are due September 1, with no discount.

JOSEPH HARRIS CO.,

Coldwater, N. Y.

December 1, 1922.

Picking Tomatoes for Seed at Moreton Farm

THIS WHOLESALE PRICE LIST

This price list is issued especially for the use of the Market Gardener and Florist who use seeds in considerable quantities and quite naturally expect to buy at lower prices than the amateur gardener who buys only small quantities of each kind.

This list **does not include** all the kinds and varieties of seeds we sell, but only such seeds as are used by Market Gardeners and Florists.

Our complete general catalogue containing description and price of all the seeds and plants we offer will be sent in January. If you do not receive your copy, please let us know and we will send another one at once.

SEEDS GROWN IN THE NORTH

Some people do not realize how important it is to use northern grown seeds for the northern parts of the country. It has been found that seeds grown in the south produce plants that require a longer time to mature than from seeds grown in the north. This fact is especially important in the case of corn, tomatoes, melons, peppers, etc. Early maturity often means a good profit on the crop, while a late strain of seed might easily prove disastrous.

We are situated near Lake Ontario where the seasons are short and all crops must mature early to escape the frost. This fact insures early maturing strains of such seeds as we raise here.

PRICE AND QUALITY

Some gardeners tell us that if we can give them seeds of really high quality they do not care about the price. These are men who know their business thoroughly and know that the extra cost of high class seed is nothing compared with the extra value of the crop over that raised from common seed.

There are other gardeners however—too many of them—who buy seeds of the dealer who offers them at the lowest price. It sometimes happens that good seeds are sold cheap, but in the great majority of cases cheap seeds are of poor vitality or of inferior breeding and therefore produce crops of very ordinary quality and consequently of low value. It is the good crops of high quality that pay.

We endeavor to produce and sell seeds of the highest quality only and to sell them at as low prices as possible consistent with the high cost of raising seeds of this grade. We could buy tomato seed at 50c per lb., but it costs us five times as much to raise the seed the way we do it. An ounce of seed will produce enough plants for an acre. The cheap seed would cost about 8c and the high grade 40c—a saving of 32c on an acre!

WILL THE SEED GROW?

When buying seeds a gardener should demand from the seller a statement as to what percentage of the seed is of good vitality. Almost all commercial seeds contain at least a small percentage of defective or dead seeds that will not germinate. This percentage varies very much in different lots of seed, and it is hard for the gardener to tell how thick to sow in order to avoid an excessive amount of thinning, or a poor stand of plants. Carrot seed, for instance, that contains 60 per cent of live seeds must be sown considerably thicker than a lot that contains 80 per cent.

Harris' Seeds are all marked showing what percentage is of good vitality.

According to Our Tests
98 per cent
 of this seed germinates

This label is put on every lot of seed (except packets) and tells you what proportion of the seeds germinated in our test of this particular lot.

The seeds are all given accurate tests either in soil or a germinating apparatus so there is no guess work about it.

ARTICHOKE

The Globe Artichoke produces the flower buds which are used for food the second year after sowing the seed. The plants are not hardy and require protection in winter north of Virginia.

		Oz.	¼ Lb.	Lb.

BEANS—Dwarf Wax Varieties

Of the wax or yellow-podded bush beans, the earliest varieties are Webber Wax with flat pods, and Valentine Wax with round pods. Wardwell's Kidney Wax is a day or two later and has very long flat pods of high quality. This bean is quite apt to rust in wet weather and for this reason Currie's Rust-proof is preferred by many. The pods are broad and deep yellow, but not quite as long as Wardwell's. Sure Crop Wax resembles Currie's Rust-proof but has longer pods and is more prolific. Both mature very early. Burpee's New Kidney Wax resembles Wardwell's but has narrower pods. Hodson Wax is late and very prolific; pods long, narrow and flat. Refugee Wax is also late and has round pods of the highest quality. It is largely used for canning.

Note. We are now offering all seeds by weight instead of measure as formerly. Beans in quantities of over 25 lbs. will be sold at the 100 lb. rate. We do not sell less than 1 lb. of beans at the pound price. A pound is a pint, 60 lb. is a bushel.

	Lb.	15 Lbs.	100 Lbs.
Sure Crop Wax. Much resembles Currie's Rust-proof, but has longer pods and matures about the same time	\$.22	\$ 2.40	\$15.00
WEBBER Wax or "Cracker Jack". The earliest wax bean with flat pods. The pods are long, straight, stringless and quite free from rust. A heavy bearer22	2.25	14.00
Valentine Wax. Extra early, round pods, free from rust..	.30	2.75
WARDWELL'S KIDNEY WAX. Very long, flat, deep yellow pods. One of the earliest and most profitable wax beans for market. Very prolific and of the best quality20	2.10	13.00
BURPEE'S NEW KIDNEY WAX. Has narrower and thicker pods than Wardwell's and is more prolific22	2.25	14.00
ROUND POD KIDNEY WAX. Like Wardwell's with round instead of flat pods. One of the best round podded wax beans22	2.40	15.00
Davis' White Wax. Hardy and prolific. Long, flat yellow pods of fair quality. Matures early22	2.40	15.00
Golden Wax, Improved Rust-proof. Short pods. Early.	.22	2.25	14.00
Hodson Wax. Late, very prolific, long, straight, flat pods..	.22	2.25	14.00
CURRIE'S RUST-PROOF BLACK WAX. Hardy and very prolific. An early and profitable market variety.	.22	2.25	14.00
REFUGEE WAX. Round pods of fine quality, very prolific, matures late22	2.40	15.00

Beans—Dwarf Green-Podded Varieties

If your market requires a round-pod bean, Full Measure, Giant Stringless Valentine and Black Valentine are the most profitable. If a flat pod is required, Bountiful is one of the best early varieties.

	Lb.	15 Lbs. (Peck)	100 Lbs.
FULL MEASURE. Very prolific, long, round pods. Medium early and a profitable market variety	\$.25	\$ 3.30
Stringless Green Pod. Round, thick, light green pods of high quality22	2.40	15.00
GIANT STRINGLESS VALENTINE. Larger than the old Valentine, and fully as early. Very prolific and one of the very best green-podded bush beans. Round, light green pods of high quality25	2.55	16.00

Dwarf Green Pod Beans—Continued

	Lb.	15 Lbs. (Peck)	100 Lbs.
BLACK VALENTINE. A profitable market bean. Produces immense crops of long, straight, light green pods, round as a pencil and very attractive in appearance.....	\$.25	\$ 2.55	\$16.00
BOUNTIFUL. Very prolific. Long, flat pods of fine quality; very early22	2.40	15.00
Improved Round Pod Valentine. Extra early.....	.22	2.40	15.00
Refugee or 1000 to 1. Late, very prolific22	2.40	14.00
NEW STRINGLESS REFUGEE. A stringless strain of the old Refugee25	2.70	17.00
Goddard or Boston Favorite. Used for shelling green....	.22	2.40	15.00
Ruby Dwarf Horticultural. Used for shelling green.....	.22	2.40	15.00
FRENCH HORTICULTURAL. The best strain of Dwarf Horticultural beans. More prolific and vigorous and free from disease than other kinds. Pods long, straight and highly colored. Matures a little later than Ruby Dwarf Horticultural and has taller vines25	2.70	17.00

LIMA BEANS—Dwarf or Bush Varieties

Where beans are sold in the pods, Fordhook is the most popular bush Lima. The beans are of good size and very plump, and the vines are prolific. For shelling, Burpee's Bush Lima of the old type and Burpee's Improved are the best kinds. The beans are large and flat.

	Lb.	(Peck) 15 Lbs.	100 Lbs.
FORDHOOK BUSH LIMA (New). A greatly improved strain of Dreer's or Potato Lima. Large pods and very large thick beans of deep green color. The best of this class	\$.30	\$ 3.60	\$23.00
Henderson's Bush Lima. Small, early and prolific25	2.70	17.00
BURPEE'S BUSH LIMA, New Wonder Strain. Large, medium early. The most popular Bush Lima28	3.00	19.00
Burpee's IMPROVED Bush Lima. (New). Larger pods and thicker beans than the old variety and of deeper green color. A little later than New Wonder Strain ..	.30	3.15	20.00

Pole Lima and Other Pole Beans

Of the Pole Limas, Early Leviathan is the earliest kind with large pods. Ideal is a little later but has larger pods and is very prolific. Challenger has thick, plump beans like Dreer's or "Potato" Lima, and is the best pole variety of this class.

Golden Cluster Wax has immense long, wide, deep yellow pods of high quality as a snap bean. Kentucky Wonder Wax has long, round, yellow pods of fine quality. It is one of the best pole beans with wax or yellow pods.

Scotia and Kentucky Wonder have long, round, green pods of high quality. Lazy Wife has flat, green pods.

	Lb.	(Peck) 15 Lbs.	100 Lbs.
EARLY LEVIATHAN LIMA. Very early, large pods. The best early pole Lima	\$.25	\$ 2.75	\$17.00
IDEAL. Has immense pods containing 4 to 6 large flat beans of high quality, vines very prolific. A few days later than Early Leviathan but the pods are much larger28	3.00	18.00
King of Garden Lima. Long pods and large flat beans.....	.28	3.00	18.00
CHALLENGER LIMA. An improved strain of Dreer's Pole Lima. Large plump beans of the "Potato" class.....	.30	3.30	21.00
Golden Cluster Wax. Produces long, broad, deep yellow pods of finest quality; beans white.....	.35	4.00	...
Kentucky Wonder. Long, slender, green pods of fine quality. Early and very prolific25	2.55	16.00
Kentucky Wonder Wax. Long, round, yellow pods, very prolific30	3.45	22.00
SCOTIA. Long, slender, green pods of the very finest quality. Wonderfully prolific35	3.75	24.00
Lazy Wife. Large, flat, green pods; very productive35	3.75	...
Speckled Cranberry or London Horticultural30	3.00	...

FIELD BEANS

(Prices per 100 lbs. subject to change. Please write for price if a considerable quantity is required.)

	Lb.	(Peck) 15 Lbs.	100 Lbs.
Boston Marrow or White Marrowfat. Large, plump, white beans	\$.20	\$ 2.10	\$13.00
Marrow Pea or White Navy. Small white beans. The most popular variety20	1.65	10.00
ROBUST PEA BEANS. A select strain of Pea beans that is free from the mosaic disease20	1.95	12.00
Red Kidney. Large red beans, very prolific and a profitable variety. Special disease-resistant strain20	2.10	12.50
WHITE KIDNEY. Large, white, kidney-shaped beans; yields heavy crops and is of the highest quality for baking20	2.25	14.00

Crosby's Egyptian Beet

HARRIS' SPECIAL STRAIN

Particular gardeners who want the very finest beets both in shape and color will find this special stock to meet their requirements.

The seed is of our own growing and the most careful selection has been practiced for more than fifteen years until now we have a strain that is practically "fixed" so that the beets come all alike, nearly every one a model for shape and color.

The beets are globe shape, very deep red and perfectly smooth with very small tap roots. The tops are unusually small. This beet grows very rapidly and is ready for market earlier than any other kind we know of. It is much earlier than Detroit Dark Red and Early Blood Turnip.

This is the finest strain of Crosby's Egyptian beet obtainable no matter what price is charged for the seed.

We are glad to say that our seed this year is exceptionally fine and shows high germination. Oz. 15c; ¼ lb. 40c; lb. \$1.25.

Crosby's Egyptian Beet

Your special strain of Crosby's Egyptian Beet is the nearest perfect in shape, color, etc., of any beet I have grown in forty years of gardening."—C. A. Baker, Milford, N. H., Aug. 9, 1920.
"I like your seeds. Your Crosby's Egyptian beet is especially fine—Very early and of better shape than any seed of that variety that I have ever used. All other seed produced so many flat ones and were no good except for earliest bunching. Yours were good and tender as long as Detroit and uniformly dark colored all through, and in every way ahead of all other beets I ever tried."—P. D. Kemrer, Lancaster, Pa., Jan. 31, 1922.

DETROIT DARK RED BEET—Harris' Selected Strain

This strain produces beets of uniform globe shape and deep red color without light rings when cut.

This is a very superior stock, being more uniform than any other strain we have been able to find.

The seed is of our own growing and the greatest care is taken in selecting the beets to set out for seed. The consequence is that this seed produces beets very small tops, fine tap roots and perfect globe shape and very deep color.

This seed costs twice as much to raise as ordinary seed costs, but the crops from it are so much superior that the seed is really worth ten times as much. Oz. 12c; ¼ lb. 35c; lb. \$1.10.

BEETS

For early bunching Crosby's Egyptian is the most popular kind; and if a really first-class strain is used there is no better beet for the purpose. Some gardeners prefer the old flat Egyptian Blood Turnip beet, because it makes salable beets a little quicker than Crosby's. For later use Detroit Dark Red and Edmund's Blood Turnip are excellent. For late fall and winter use it is best to sow the seed about the middle of July in the North and a little later further South. It requires about 10 lbs. of seed to sow an acre.

CROSBY'S EGYPTIAN, Harris' Selected Strain. The finest bred stock of this beet. See description above.	Oz.	$\frac{1}{4}$ Lb.	Lb.
Seed of our own growing	\$.15	\$.40	\$ 1.25
Crosby's Egyptian. Not of our own growing, but a very good strain, superior to most of the seed sold by other dealers10	.25	.75
EARLY WONDER. Quite similar to Crosby's Egyptian but flatter than our strain of that variety. Early and of good color10	.25	.80
Egyptian Blood Turnip. Flatter than Crosby's, and is preferred by some for early bunching10	.25	.75
DETROIT DARK RED, Selected Strain. Seed of our own growing, very superior stock. See description above..	.12	.35	1.10
Detroit Dark Red. Not of our own growing but good seed, equal to any obtainable for the price10	.25	.75
ECLIPSE. Early, globe-shaped and very handsome beet, of somewhat lighter color than Detroit but earlier.....	.10	.25	.75
Edmund Blood Turnip. Large flat beets. Excellent for fall use10	.25	.85
Early Blood Turnip. A good old variety, much like Edmund's10	.25	.85
Early Bassano. Large, flat, light-colored beets10	.25	.85
Long Smooth Blood Red. 8 to 10 inches long and very dark red10	.25	.90
LONG SEASON. A very late variety of fine quality.....	.20	.60	2.25

Note. We do not sell half ounces unless the price per ounce is 30c or more.

Mangels and Sugar Beets for Stock

	Oz.	$\frac{1}{4}$ Lb.	Lb.
DANISH YELLOW GIANT. An immense yielder. Very large, oval, deep yellow and rich08	.15	.45
Golden Tankard. Oval and easily harvested; yellow flesh. The strain we offer is very fine08	.15	.40
NEW 'HALF SUGAR' MANGEL. Intermediate between a sugar beet and mangel. Yields immense crops of beets rich in sugar08	.15	.45
Mammoth Long Red. Very large, long red roots of good quality. One of the best yielders and keeps well.....	.08	.15	.40
Giant Yellow Eckendorf. Very large yellow mangel. Blunt at the bottom, easily harvested and immense yielder..	.08	.15	.45
Lane's Improved Sugar Beet. A very large sugar beet for stock.08	.20	.55

Beets for Greens—SWISS CHARD or SPINACH BEET

The Silver Leaf has smooth, light-green leaves with very broad, white ribs and is the most popular variety for market. Lucullus grows very large and has crinkled leaves with yellowish ribs. Both varieties are quite hardy and will survive the winter if given some protection.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
Silver Leaf. Large, green leaves with white ribs	\$.08	\$.20	\$.70
LUCULLUS. Very large crinkled leaves with light-yellow ribs08	.20	.70

BRUSSELS SPROUTS

Cultivation is the same as for cabbage or cauliflower. There is always a good demand for the sprouts, and they bring profitable prices.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
DANISH IMPROVED. An excellent late variety that yields well if set out before the middle of June in the north	\$.35	\$ 1.00	\$ 3.75
LONG ISLAND IMPROVED DWARF. Special strain. Plants only 18 in. high but are covered from bottom to top with large solid sprouts crowded close on the stalk and they mature early. We offer proved seed that we know will produce excellent results. 90 per cent of the plants yield high grade sprouts.....	.40	1.25	4.25

CABBAGE

New Early Cabbage "GOLDEN ACRE"

Golden Acre Cabbage

A wonderfully fine early variety with perfectly round heads of good size and which mature a week earlier than **Jersey Wakefield**. The heads resemble Copenhagen Market of a very finely bred type. The plants are small with few leaves but the head is of good size, weighing 5 to 6 lbs., as round as a ball, very firm and of good bright green color. Every plant produces a good head and they are all just alike.

Owing to its extreme earliness this cabbage will prove profitable for the first early crop. The supply of seed is so limited that we can offer it only in very small quantities this season. **Packet** (200 seeds) 20c; $\frac{1}{4}$ oz. \$2.00. (No larger quantities can be sold.)

Midseason Market Cabbage

This new cabbage has proved to be the most uniform and heaviest yielding medium early variety in our trials the past two seasons. Every plant produces a fine large, round head, every one just alike. This variety is much like Enkhuizen Glory but the heads are larger and mature a few days later. Owing to its perfect uniformity and large size the yield is immense.

We highly recommend this new cabbage for market, shipping, or kroust. It is the best variety of its class we have ever seen. **Oz.** 75c; $\frac{1}{4}$ lb. \$2.00; lb. \$7.50.

This price list does not include all the seeds we sell. For other kind see our complete general catalogue which is issued in January each year.

Midseason Market

CABBAGE—Early Varieties

Jersey Wakefield has long been the standard extra early cabbage, but a round head sells better in most markets and on this account the New Golden Acre and Copenhagen Market have proved more profitable. Enkhuizen Glory has larger heads and is a week later. Burpee's All Head has large flat heads and is a week or two later than the Enkhuizen Glory.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
EARLY JERSEY WAKEFIELD. The standard Early variety. Heads pointed, of medium size and very hard. Our strain is particularly fine, the heads being very uniform and mature early	\$.35	\$.1.00	\$ 3.75
CHARLESTON WAKEFIELD. Larger and 10 days later than Jersey Wakefield. Heads larger around and not so pointed35	1.00	3.75
COPENHAGEN MARKET. Heads round, medium size and very solid. Matures very easily and every plant makes a good firm head40	1.25	4.25
ENKHUIZEN GLORY. A very large, early cabbage. Heads as large as late kinds and mature as early as Charleston Wakefield. Has proved to be a most profitable variety30	.75	2.75
BURPEE'S ALL HEAD EARLY. Heads of good size, deep, solid and heavy. Matures medium early. Largely used for main crop for fall market and shipping.....	.28	.70	2.50
Henderson's Early Summer. A fine early flat cabbage....	.30	.85	3.00
Stanley. Pointed heads of high quality. Not suitable for market45	1.50

Types of Danish Ballhead Cabbage

Solid Emperor

Intermediate

Short Stemmed

CABBAGE—Late or Main Crop Varieties

For fall use the early varieties are usually the best, but the plants should be set out not earlier than July 1, in New York State, and later farther south.

Enkhuizen Glory and Harris' Summer Ballhead are both excellent kinds for market or kraut, having large round heads of fine quality.

For late fall and winter market the Danish Ballhead is the most profitable. The Short Stemmed strain we offer yields more than any other of the Danish type, but is not as deep green as the Solid Emperor or Tall Stemmed strain, which has smaller heads and does not yield quite as many tons per acre. The Intermediate strain is halfway between the two, having shorter stems than the Solid Emperor and larger heads. It is a very fine Danish Cabbage.

Savoy cabbage is often a profitable crop for home market. Red Cabbage is also profitable on good, rich land.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
Volga. The heads are large, round and solid; a heavy cropper	\$.30	\$.85	\$ 3.00
HARRIS' SUMMER BALLHEAD. Large, round, solid heads which mature medium early. One of the very best kinds for fall market or krout30	.85	3.00

	Oz.	$\frac{1}{4}$ Lb.	Lb.
DANISH BALLHEAD, Solid Emperor Strain. A very fine strain of the genuine Danish Cabbage. Heads round (not flat) and deep green and very hard. Stems rather long. The best keeper. Proved Seed.....	\$.30	\$.80	\$ 3.00
DANISH BALLHEAD, Intermediate. Has shorter stems and larger heads than the Solid Emperor and is of deeper green color than the Short Stemmed strain. A very fine strain. Proved Seed30	.90	3.50
New Seed, not proved25	.80	2.75
DANISH BALLHEAD, Short Stemmed. Matures quicker than the Solid Emperor Strain, has shorter stems and larger heads, but not quite as deep green color. Proved Seed30	.90	3.50
New Seed, not proved25	.80	2.75
Surehead. Deep, heavy heads. A good, late variety.....	.30	.75	2.75
Succession. A popular cabbage for fall market30	.75	2.75
All Seasons. Large flat heads30	.75	2.75
Premium Flat Dutch. Old standard kind. Large, heavy head30	.75	2.75
Winningsstadt. Pointed heads of medium size30	.75	2.75
RED DANISH STONEHEAD. A new red cabbage much like a red Danish Ballhead. Grows to a good size and heads evenly35	1.00	3.75
MAMMOTH ROCK RED. The largest red cabbage. Hard, round deep red. One of the best red varieties for market or shipping. Proved Seed35	1.00	3.75
SAVOY, Perfection Drumhead. Heads large and quite firm30	.80	3.00
SAVOY, Sutton's Best of All. Large heads, quite firm and of a light green color. Produces the largest heads of any Savoy we know of30	.80	3.00

CHINESE OR CELERY CABBAGE—PE-TSAI

This Chinese cabbage has proved to be a very profitable crop for muck land. There is a good demand for it from New-York and other large markets in carload lots. The seed is sown in July or August and the crop matures in eight to ten weeks. The heads grow nearly two feet tall and are compact and heavy. We have a fine strain. Oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.75.

Snowball, Perfected Strain

CAULIFLOWER

Snowball, of the best strain, makes large solid heads quite early. There is usually not much demand for cauliflower before September, so the plants should be set out from June 15th to July 10th. The later plantings usually produce larger and firmer heads. "Danish Perfection" has more leaves than Snowball which protects the head better. It is a week or ten days later than Snowball, and a little earlier than Danish Giant or Dry Weather, which produces large solid heads, but should be set out earlier. Large Algiers makes loose, flat heads of large size and of high quality, but not of the best form for market.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
SNOWBALL, Perfected Strain. A very fine improved strain of the true Snowball type. The plant is dwarf and compact and the heads are large, solid, snow white, and with no protruding leaves when well grown under favorable conditions. Matures early but usually the best heads are obtained from plants set out rather late. The seed we offer is the very finest strain obtainable, 95% of the plants make good heads. There is no sense in paying more for the seed than we charge, as no better seed can be obtained at any price..... $\frac{1}{4}$ oz. .60	\$ 2.00	\$ 7.00	\$26.00

Danish Giant Snowball or "Dry Weather." Ten days or two weeks later than Snowball and of more vigorous growth and stands drought better..... $\frac{1}{4}$ oz. .65	Oz.	$\frac{1}{4}$ Lb.	Lb.
	\$ 2.10	\$ 7.50	\$28.00

Erfurt Early Dwarf. Much like Snowball, but not quite so good $\frac{1}{4}$ oz. .60	2.00	7.00
Large Algiers. Large, rather loose heads, but of fine quality $\frac{1}{4}$ oz. .35	1.35	3.50

Chantenay Danvers

CARROTS

Chantenay is considered the best variety for market or table use. The roots grow very smooth and not too long. Danvers Half Long grows an inch or two longer and yields more, so is preferred when the crop is to be used for feeding stock. Coreless or Amsterdam Forcing is of fine quality for table use.

Oxheart makes a nice short, thick carrot for bunching. Early French Short Horn is very short, but grows rapidly and is best for forcing. All of these varieties are deep orange in color.

CHANTENAY. The most popular market variety, six inches long, stump-rooted, deep orange color and very smooth. **Pkt.** 10c; **oz.** 25c; **lb.** 80c.

DANVERS' HALF LONG. Grows about 8 in. long, deep orange color all through; not quite as smooth as Chantenay. A heavy cropper and valuable for stock feeding and market. **Pkt.** 10c; **oz.** 25c; **lb.** 75c.

CORELESS or Amsterdam Forcing. The carrots grow about 5 in. long and 2 in. through and the same size the whole length. The end is blunt and with very fine rat-tail root. The color is deep orange red all through the root including the core, hence the name "coreless" as the small core is inconspicuous. This is a beautiful carrot for bunching or to market in bulk15	.40	1.40
OXHEART or Guerande. Short, thick carrots, used for bunching and table use. Very easily pulled. About 4 inches long, deep orange yellow, and of fine quality.10	.25	.75
MASTODON or WHITE VOSGE. Large, white carrot for stock feeding. Immense yielder, 8 to 10 inches long.10	.20	.70
Long Orange. Roots a foot long, yields large crops.....	.10	.25	.75
Early French Short Horn. For forcing. About 3 inches long; very early15	.35	1.25

CRESS

Extra Fine Curled , also called "Pepper Grass".....	.12	.30	.90
WATER CRESS , Improved Broad-Leaved. Much better than common Water Cress40	1.25	4.50

NOTE We do not sell half ounces unless the price per ounce is 30c or over

CELERY

Two-thirds of all the celery grown is Golden Self-Blanching, or "Paris Golden," which is the same thing. This is the most profitable variety for market up to January. For later use, the green varieties should be used. Easy Blanching blanches quickly and can be marketed early. French's Success is one of the very best for late winter market and keeps longest. Columbia of a good strain, is excellent to follow Golden Self Blanching.

GOLDEN SELF BLANCHING or Paris Golden.

We can now offer two strains of this popular variety. There has been considerable trouble experienced by growers during the last few years with blight and root-diseases which attack the Golden Self Blanching much more severely than other varieties. There has now been developed by a French grower a strain that is practically free from rust and other diseases. It also grows with much greater vigor and attains a larger size than the old strain. The stalks are taller and not quite so broad. This is undoubtedly the best strain for early market. Some growers prefer the old strain for storage, while others like the new. On rich muck the new strain grows very large and may get too tall if it is set out before the middle of July. See prices on next page.

Golden Self Blanching From
Harris' Seed.

EASY BLANCHING or Sanford Superb Celery

We find this new celery a first-class variety to follow Golden Self Blanching. It is of the same dwarf, compact habit of growth, blanches easily and quickly, and is of fine quality. The leaves are green and the stalks pure white when blanched. It is superior to the Golden Self Blanching in keeping qualities. We have kept a lot of it in good shape until spring, and set it out for seed. We can now offer seed of a superior strain of this variety grown by C. E. Garrahan, a well-known celery grower. The celery has very heavy stalks, blanches easily, and is perfectly firm and solid. We highly recommend this strain. Oz. 95c; $\frac{1}{4}$ lb. \$3.25; lb. \$12.00.

FRENCH'S SUCCESS CELERY

We do not know of any green celery quite equal to French's Success. The stalks are of good length, very thick, firm and brittle. When grown from our selected seed there are no soft stalks.

The keeping qualities of this celery are remarkable. It is not difficult to keep it in good condition until March. It is a better keeper than Columbia, and heavier, more uniform and more solid than Winter Queen and Giant Pascal.

Beware of seed of this variety offered by other dealers. We know by our trials that all of it is far inferior to our own original strain, which we got from Mr. French himself over 15 years ago. Crop of seed very short again this year. Oz. 95c; $\frac{1}{4}$ lb. \$3.25; lb. \$12.00

GOLDEN SELF-BLANCHING or PARIS GOLDEN. Seed	Oz.	$\frac{1}{4}$ Lb.	Lb.
grown by the originator in France.			
New Strain. Blight-resistant and grows more rapidly and gets larger than the old strain.....	\$ 1.00	\$ 3.25	\$12.00
Old Strain. Proved seed from which a crop has been grown so we know it is of the highest quality. There were no soft or green stalks in the crop	1.00	3.25	12.00
GOLDEN ROSE, or Rose-Ribbed Self Blanching. Like Golden Self-Blanching tinged with red. Keeps better and is of finer flavor90	3.00
White Plume. We have a very fine, pure strain of this popular celery25	.75	2.75
EASY BLANCHING. Also called Sanford Superb	1.00	3.25	12.00
Columbia. Much resembles Golden Self-Blanching in growth and appearance, but is a green celery and does not blanch so quickly and keeps longer. A valuable kind for early winter market45	1.40	4.50
Newark Market. Very similar to Easy Blanching of a good strain. A fine variety for fall or early winter use	1.00	3.25	12.00
FRENCH'S SUCCESS. The best keeper we know of. Keeps well until spring. Very firm and crisp, never grows soft95	3.25	12.00

SWEET CORN

ALPHA—The Earliest Sweet Corn

We have never before found a true Sweet Corn that was any earlier than our strain of Mammoth White Cory. The past season in our trial grounds we discovered a variety that matured **three or four days earlier** than any other kind. This variety is called "Alpha." The ears are 5 to 7 in. long with 8 rows of large white kernels and has a white cob. The stalks are only 4 to 5 ft. high.

Owing to its extreme earliness the Alpha will undoubtedly prove a profitable corn for the market grower. With this variety it will be perfectly possible to get corn on the market 4 days to a week earlier than any one else and get the high prices that are always paid for the first corn. **Lb. 35c; 12 lbs. (peck) \$3.25; 25 lbs. or more 26c per lb.**

HARRIS' MAMMOTH WHITE CORY

There are many varieties of Sweet Corn claimed to be the earliest. We have tried every kind we could get the seed of and planted it side by side with our strain of Mammoth White Cory on the same day. No kind has matured earlier except the new "Alpha" which has smaller ears.

Harris' Mammoth White Corn has good, large ears 6 to 7 in. long, 8 to 10 rowed pure white and of fine appearance.

The stalks are small but often carry two large ears which grow quite low down. This corn is "Mammoth" only in the sense that it has much larger ears than the old Cory Corn.

It is a profitable corn to raise because it gets on the market before any other kind having ears equally large, and always brings the highest price. It has sold as high as \$1.00 per doz. on the Rochester market. Seed of our own raising, selected for earliness and large 10 rowed ears. **Lb. 25c; 12 lbs. (peck) \$2.00; 25 lbs. or more 16c per lb.**

Whipple's Yellow Golden Bantam
Photograph showing comparative size

WHIPPLE'S YELLOW Sweet Corn

Earlier than Bantam and as large as Evergreen

This is a wonderful early yellow corn that ought to be very profitable to raise for market. The ears are very large, 8 to 9 in. long, having 12 to 16 rows of deep kernels. They mature ready for use **three to four days earlier** than Golden Bantam. The quality of the corn is very fine, but possibly not quite as sweet as Buttercup.

Its large size and earliness should make it a most profitable market variety. The ears are of the same type as Whipple's Early and mature at about the same time. **Lb. 35c; 12 lbs. (peck) \$3.00; 25 lbs. or more 22c per lb.; EARS, \$10.00 per 100 ears.**

"It may be of interest to you to state that I planted Whipple's New Yellow corn on May 19th and picked good full ears on July 24th. Quality delicious. A wonderful variety for the market gardener."—H. W. Leggett, Schuylerville, N. Y., July 25, 1922.

"It may interest you to know we got our first corn (Whipple's New Yellow) on July 1st. Beats anything in our experience."—R. H. Rennie, Chicago, Ill., July 4th, 1921.

Pocahontas Sweet Corn

This corn has proved to be the most profitable market variety in past years.

It matures only three or four days later than the very earliest kinds and has ears **twice as large.**

The ears are really immense. Often measuring 10 and 11 in. long with 8 to 10 rows of very large kernels.

The stalks are of medium height and often produce two big ears.

We have this corn so well bred that practically every ear is well filled and of large size so the yield of salable corn is very large. The ears are so large and handsome and come so early that it always brings the top price. **Lb. 25c; 12 lbs. (peck) \$1.70; 25 lbs. or more 13c per lb. EARS \$5.00 per 100 ears.**

"Pocahontas is, we think, the sweetest white corn grown and certainly yields well, most every stalk having two fine ears. Mimms' Hybrid has given excellent satisfaction as the ears are so very large and we have had as high as 4 ears on a stalk, three of which were good marketable ears."—Evan J Robinson, Alden, N. Y., March 10, 1922.

MIMMS' HYBRID SWEET CORN

This corn was originated by one of our gardener friends, Mr. J. W. Mimms. It is the largest and best medium late corn we know of.

The ears are very large, often nearly a foot long, with 10 to 12 rows of large white kernels that are very sweet and delicious. The ears are longer than Stowell's Evergreen and not quite so large around. They mature before Evergreen and always command a good price in market on account of their large size and high quality. The stalks grow 7 feet tall and produce **nearly twice as many ears per acre as the Evergreen.**

Gardeners will do well to try this new strain. We are quite sure they will find it a valuable second early kind to come between the small extra early varieties and Evergreen. **Lb. 25c; 12 lbs. (peck) \$1.70; 25 lbs. or more 13c per lb. EARS, \$8.00 per 100 ears.**

"The Mimms' Hybrid Sweet Corn is certainly fine. I have raised it two seasons and have had the best in the market."—E. B. Underhill, Poughkeepsie, N. Y.

"The Mimms' Hybrid Corn sells for better money than any other kind on the Milwaukee market."—Alex. Cleveland, Milwaukee, Wis.

WHIPPLE'S EARLY SWEET CORN

A Wonderful New Early Variety

Looks like Evergreen and is as early as Cory.

We introduced this corn in 1919 and claimed it has the largest ears of any corn that matures so early. We have received many very flattering reports from gardeners who tried it and we are quite sure that all who grew it last season were more than pleased with it.

To describe it briefly it is like Stowell's Evergreen in size and shape, but matures **very early**—as early as Pocahontas and Red Cory, **much earlier** than Kendel's Early Giant, Metropolitan, Golden Bantam, etc. The quality of the corn is far superior to Evergreen, the corn being sweet, tender and delicious.

A profitable market variety—Think of putting on the market a big 16-rowed ear of corn as early as others are bringing in Cory! It sells on sight and at top prices. Fully half the stalks have two large ears even when planted quite close together. The yield therefore is immense.

In our opinion it is **the most valuable early Sweet Corn ever produced** and will take a prominent place in the list of varieties best suited for the market grower. Those who plant this corn **now** will reap the benefit.

The ears are 7 to 8 inches long and very large around, as they have 14 to 18 rows of good size kernels. Each ear is filled right out to the tip. The kernels are long and narrow like Evergreen.

We offer seed of our own growing of highest quality. Get headquarter seed. It is very highly bred and the true originator's strain. **Lb. 25c; 12 lb. (peck) \$2.00; 25 lbs. or more 16c per lb. EARS. \$9.00 per 100 ears.**

What Gardeners say About Whipple's Early Corn.

"Your Whipple's Early corn is a fine thing. It proved as early as Corn and the ears are twice as large."—Eugene Thayer, Bowie, Md., March 6, 1922.

"The Whipple's Early Corn which we planted May 14th had some fine ears fit for use July 4th." Mrs. A. Duke, Muskogee, Okla., Aug. 9, 1921.

"Your Whipple's Early Corn can't be beat. The Golden Bantam corn stands high, but after I make one sale of Whipple's and they try it, it is clear sailing. I shall plant more next year. I am much pleased with the seeds I received from you." Cassander Gilmore, Raynham, Mass., Sept. 23, 1921.

"I was pleased with Whipple's Early Sweet Corn. Had ears 74 days from planting that weighed one and one-half lbs. each." Fred Griffin, Hamburg, N. Y., Sept. 6, 1921.

"I planted two quarts of your Whipple's Sweet Corn last year along side of Early Fordhook and at the same time and on the identically same ground, and believe me, I was surprised when the Whipple Corn with its big ears was ready to pull the same day the Fordhook corn was. And such a contrast in the size of the ears of corn! It will certainly make friends for you wherever you sell it."—L. W. Humpton, Coatesville, Pa.

"I take this opportunity to congratulate you and Mr. Whipple upon Whipple's Early Sweet Corn. With me it has ripened about with Golden Bantam, but it is eared much heavier, and the ears are twice as large. The quality is equal to Country Gentleman and is two or three weeks earlier. It is the best all-around corn that I have tried for the Northern latitudes."—L. E. Johnson, Richfield Springs, N. Y.

BUTTERCUP SWEET CORN

The Sweetest Corn Grown

Buttercup Sweet Corn

\$1.70; 25 lbs. or more at 13c. EARS, \$7.00 per 100 ears.

What Gardeners say of Buttercup Corn:

"Buttercup corn is the easiest money ever. Had everyone in town stopped for corn. Lots wondered how I got Golden Bantam to grow so large! It does not harden so quickly either as Henderson's Golden Rod."—W. H. Toplin, Milford, Mass.

"I bought from you one pint of Buttercup sweet corn and planted same 4 kernels in a hill. Family of 5 used all we wanted, sold 75 doz. ears at 20c per dozen—\$15.00. I find this corn better than you recommended."

It is sweeter than Golden Bantam. I have ears 11 inches long."—G. W. Stanton, Union Center, N. Y.

"I was especially pleased with the Buttercup corn which was new to me, and I believe it is much superior to Golden Bantam."—W. B. Snow, Raleigh, N. C.

"I wish to advise you that the Buttercup corn was the earliest and sweetest of nine kinds that I raised last year. Even the name 'Buttercup' was worth the price."—Herbert Durrell Smart, Nashua, N. H.

CORN ON THE EAR

If desired, we can furnish sweet corn of most of the varieties described on these pages unshelled. It is much more trouble and much more expensive to pack and ship ears than shelled corn, so we have to charge a somewhat higher price for the ears. The corn, however, is really no better. The shelled corn is from the same crops and all poor ears are rejected before shelling, so the same results are obtained from either shelled or unshelled seed. 25 ears or more are sold at the 100 price. No smaller quantities can be supplied.

HARRIS' PEDIGREE SWEET CORN

We have long made a specialty of raising sweet corn seed of the highest possible quality. It is largely raised on our own farms where selection can be made to the best advantage while the corn is growing. Selection for "breeding stock" is made from stalks that produce the first mature ears in the case of the earliest varieties and from stalks that yield the largest and best ears of the later kinds.

When the corn is ripe it is placed in drying houses where it is thoroughly dried under moderate heat. This insures strong germination. Corn of our own raising usually germinates 98 to 100 per cent even in most unfavorable seasons.

There is another point that should not be overlooked. It is a well known fact that sweet corn grown in the North is far better both in quality and early maturity than the same variety raised in the South or Western states. We are as far north as corn can be successfully raised for seed purposes, so the seed raised here produces corn that matures early and is of the highest quality.

SWEET CORN

Our sweet corn is very carefully cured and is of strong vitality. The percentage that germinates in our tests is marked on the label of each lot we sell, so the planter can tell just how thick to plant.

Note: 25 lbs. of one variety will be supplied at the 100 lb. rate

Harris's Perfection Cucumber (Photograph)

CUCUMBER—Harris' Perfection

This variety has been selected for many years with the idea of getting a cucumber as near perfection as possible. The fruit is long, straight, smooth and handsome. The color is deep green with clear white rays on the blossom end. The cucumbers retain this deep green color longer than any kind we know of. The fruit will average over a foot long when matured and many reach 15 inches in length.

The vines are vigorous and resist blight well. This is a White Spine variety and is one of the very best of this class. The fruit matures as early as the short kinds and are far superior to them. Our seed is so carefully bred that practically every cucumber is of almost perfect shape. See price below.

IRONDEQUOIT HOTHOUSE CUCUMBER

The gardeners around Rochester have developed a very fine hothouse cucumber that has proved the most profitable variety to raise under glass.

The fruit is long, slender, deep green and nearly perfectly solid, there being very few seeds, and in some fruit none at all.

The vines are wonderfully vigorous and very prolific.

The seed we offer was saved entirely from fruit grown under glass. Packet of 50 seeds 60c; 100 seeds \$1.00; 500 seeds \$4.00.

ENDIVE

Seed can be sown any time from early spring to August 1, in the Northern States. For late fall market sow in July. Sow in rows 18 to 20 in. apart and thin the plants to a foot apart. To blanch tie up the leaves with soft cord or raffia. It requires about 20 days to blanch thoroughly in cool weather. Green Curled is the most popular market variety. Broad-leaved Batavian is also in good demand. "French Endive" is Witloof Chicory and is quite distinct from True Endive, and its culture is entirely different.

Broad-Leaved Batavian Endive	Oz.	¼ Lb.	Lb.
GREEN CURLED. Large leaves finely cut and curled.....	.12	.30	.95
Moss Curled. Finely cut and curled; not so large as Green Curled12	.30	1.00
Broad-leaved Batavian (Escarolle)12	.30	.95

"FRENCH ENDIVE"—WITLOOF CHICORY

This is a crop that can be grown during the winter in a dark place and at very little expense. There is a growing demand for "French Endive" in the markets of all the large cities.

Directions for culture will be sent to any one interested without charge.

Seed. Pkt. 10c; oz. 35c; ¼ lb. 90c; lb. \$3.25.

Roots for Forcing

We can furnish first-class Witloof Chicory roots ready for forcing at the following prices:	
100 roots	\$1.50
500 roots	5.00
1000 roots	9.50

These roots can be shipped any time after December 1st. Forcing should commence in December and continue all through the winter. **Order roots early.** They can be kept in any cold cellar. Freezing does not hurt them if they are covered with a little sand.

EGG PLANT

Black Beauty Egg Plant

Black Beauty produces fruit of good size and of deep purple color, and is the most popular market variety. New York Improved is very similar, but the plant grows a little taller and the fruit matures a little later. Oz. $\frac{1}{4}$ lb. Lb.

Kohl Rabi—White Vienna

KOHL RABI

In some markets there is a good demand for Kohl Rabi. It is raised the same as turnips, but the seed should be sown in rows and the plants thinned to a foot apart. White Vienna is the best market variety.

Large Green. Used for stock feeding \$.12 $\frac{1}{4}$ Lb. Lb. \$ 1.25

Early White Vienna. The best variety for table use very early and can be used 10 weeks after sowing15 .45 1.60

Early Purple Vienna. Differs from White Vienna only in the color of the bulb which is light purple15 .45 1.60

LETTUCE

For forcing May King is an excellent head variety. It will stand more heat than Big Boston, and matures quicker. Big Boston is fine for cool houses and cold frames. For a curl leaf lettuce Grand Rapids is by far the most popular. Grows rapidly and the leaves stand upright so can be planted close.

For summer planting in the open ground, Iceberg, Unrivalled, Salamander, Holyrood Hot-Weather and Deacon are good. Big Boston is most largely grown on muck land for both early and late crops.

Romaine or Cos Lettuce can be grown both in the hothouse and open ground and is in good demand in many markets. Trianon Self-Folding is the largest kind; the heads often being nearly a foot high. Eclipse is shorter and forms the head earlier. Both do best in cool weather.

Harvesting Harris' Selected Big Boston Lettuce on the Gardens of J. H. Snyder, Sodus, N. Y.

SELECTED BIG BOSTON LETTUCE

Our strain of this lettuce is exceptionally fine. Heads uniformly solid and compact, and stand a long time without bolting. Some of the largest growers in this county are using Harris' Big Boston and find it equal if not superior, to any other stock obtainable at any price. Oz. 12c; $\frac{1}{4}$ lb. 35c; lb. \$1.25; 5 lbs. or more \$1.20 per lb.

Mr. F. M. Hull, Red Creek, N. Y., writes:

"The Big Boston Lettuce I received from you this spring was the best I ever had. Only one plant not true to name in the whole piece.

Mr. Roy L. Smith, a large grower at Cato, N. Y., writes:

"I sowed two acres with your Big Boston last fall and every one that saw it said it was the finest piece of lettuce they ever saw. It was the finest I ever raised."

Mr. M. E. Kerwin, an extensive lettuce grower of South Lima, N. Y., writes:

"Your Big Boston lettuce has done fine for me. About 50 members from Cornell University were in South Lima one day last summer and they told me your lettuce was the nicest stock they had seen there."

"Your Big Boston was the finest I ever grew. There was no lettuce like it on the market."—I. Kreigsmann, Elizabeth, N. J.

Large American Flag. The most popular variety.....	.12	.40	1.50
---	-----	-----	------

MUSKMELON or Cantaloupe

Nearly every market wants a different muskmelon. Rocky Ford and Paul Rose are probably the most popular in many markets, and are excellent melons for shipping. Admiral Togo is an improved variety of this class and better than the older types. Hoodoo or "Hearts of Gold" is another good one of this class; small, firm, heavily netted and deep yellow flesh of high quality. Osage is in demand in some cities and is a large, handsome, round melon of high quality and good for near-by markets. Bender's Surprise is now the most popular of the large melons. It is very firm and keeps a long time after picking and is of the highest quality. Emerald Gem is small, but very early and of high quality. It is not good for shipping.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
IRONDEQUOIT. Large, round, netted; yellow flesh. A fine strain of the well-known Surprise melon.....	.20	.55	2.00
BENDER'S SURRISE. A grand melon. See description on next page45	1.35	5.00
EXTRA EARLY KNIGHT. A very early melon popular in markets where known. The fruit is of medium size. oval in shape and well netted. The flesh is green and is sweet and of good flavor15	.40	1.50
HOODOO or "HEARTS OF GOLD" A fine melon for shipping in baskets—small, round and well netted. Flesh orange yellow and of high flavor. Very firm and holds up well for a long time after picking.....	.12	.35	1.25
ADMIRAL TOGO. Oval, netted; flesh yellow and of finest flavor. Very prolific, medium size, slightly larger than Rocky Ford12	.35	1.35
Miller's Cream, or Osage. Oval, dark green, slightly netted. yellow flesh of fine flavor. A very fine melon and a profitable one for market12	.35	1.25
OSAGE, Perfected Strain. A very carefully bred strain of Osage melon which is 10 days earlier than the old type and the fruit is almost as large and is more uniform in shape and quality. This is a fine melon and will prove very profitable on account of its earliness and fine quality20	.50	1.75
EMERALD GEM. Small, round, green, slightly netted. yellow flesh of finest flavor; very early and prolific....	.15	.40	1.50
PAUL ROSE. Fruit of medium size, oval netted and very firm. Flesh orange yellow and of high quality. A valuable melon for market and shipping.....	.12	.35	1.25

DELICIOUS GOLD-LINED ROCKY FORD. A very fine improved strain of the Rocky Ford melon. The flesh is green but has a yellow tinge about the seed cavity making it very attractive when cut.....	.15	.45	1.60
Hackensack. The standard, large netted, green flesh melon	.10	.30	1.10
Honey Dew. A melon that will keep two months after picking. It is shipped to eastern cities from California and the Southwest where it does well. It does not suc- ceed here15	.40	1.50

BENDER'S SURPRISE MUSKMELON

A Grand Melon for both Shipping and the Home Market

We have raised muskmelons for many years, but have never seen a melon quite equal to the Bender in fine flavor, size and keeping qualities combined.

Mr. Bender's melons have a wide reputation for high quality among clubs and the best hotels. The seed was never offered by any dealer for a long time, but the public now has an opportunity to get seed that is of the **genuine Bender** strain which we have grown and selected for five years.

The melons are round to oval in shape, ribbed and partly covered with netting. The flesh is very thick, especially so at the blossom end so that the melons rarely crack.

When ripe the melons turn a golden tint which shows through the netting and gives the fruit a very attractive appearance.

The size of the melons averages quite large, many weighing 10 lbs. and more. We have had melons that weighed 16 pounds.

A valuable point about these melons is that they will keep in good condition five or six days after picking, and actually improve in flavor during that time. The flesh is so firm and thick that the melons remain firm and in good condition much longer than other large melons of this class. For market and shipping this is an important consideration.

We offer seed of our own growing and from melons of the highest quality. The quantity of this high grade seed is quite limited. We advise early orders. **Oz. 45c; $\frac{1}{4}$ lb. \$1.35; lb. \$5.00.**

WATERMELON

Harris' Earliest, Cole's Early, and Ice Cream or Peerless are valuable for the North because they will ripen before frost.

For places south of New York City, Tom Watson and Kleckley Sweets are better because they are larger and of high quality.

White London. The seed is used for flavoring pickles....	.08	.15	.45

ONIONS

Note.—Our Onion seed is all tested for germination before it is sent off, and the per cent. that germinates is marked on the label.

For market and storage a globe-shaped, yellow onion is usually preferred, although for some markets a red onion sells best. Yellow Globe Danvers is nearly round. Ohio Yellow Globe is slightly flattened on the bottom, and Southport Yellow Globe is more pointed at the bottom, forming an oval shape rather than perfectly round. These are the typical shapes for the different strains as they are supposed to be, but of course there are some onions of all these shapes in any of these different strains. The Danvers and Ohio strains are a little earlier than the Southport and are the most popular varieties. Round Yellow Danvers is flatter than the Globe and matures earlier. Prizetaker is larger than the Globe Danvers and a little later.

For pickles Early Barletta is best. The seed should be sown very thick so the onions will be small and the yield heavy.

Special prices will be quoted on large lots of Onion Seed. Please write us stating what kinds and quantities you want.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
YELLOW GLOBE DANVERS, Harris' Selected Strain. Our seed of this variety is grown from very carefully selected bulbs, and will be found much superior to the seed usually sold. It produces bulbs of uniform globe shape, deep yellow color and with small tops.....	\$.15	\$.40	\$ 1.45
OHIO YELLOW GLOBE. A very fine strain of Yellow Globe Onion especially suited to muck land. The onions are globe shaped, but a little more flattened on the bottom than the Globe Danvers or Southport.....	.15	.40	1.45
ROUND YELLOW DANVERS. Earlier and flatter than Globe Danvers15	.40	1.40

Long Hollow Crown. Long, smooth roots.....	.12	.35	1.25

Harris' Model Parsnip—Every One a Model. Photographed Exactly as Dug.

HARRIS' NEW MODEL PARSNIP

We have been improving the old Hollow Crown parsnip by careful selection for some years until we have obtained a very fine strain which we call "Harris' Model." The shape is shown in the photograph above.

The parsnips grow to a good length, but not too long. The roots are smooth, snow white, and have practically no side roots or prongs. Their whiteness is quite remarkable and gives the roots a very attractive appearance.

Our seed is grown from transplanted and very carefully selected roots and it will be found far superior to the seed usually sold. **Oz. 15c; ¼ lb. 40c; lb. \$1.50.**

From a very extensive gardener.

"I want Harris' Model Parsnip seed the same as you sent me last year. It is as fine as silk."
—Del Titus, Irondequoit, N. Y.

"Your New Model Parsnips are head and shoulders above everything else. I have used your seeds for a number of years and they beat any seeds I obtained elsewhere, and I have used seed from all the leading Eastern seedsmen."—L. W. Brotzman, Broome County, N. Y.

PARSLEY

	Oz.	¼ Lb.	Lb.
DWARF PERFECTION. The finest parsley we have ever seen. Dark green and very finely curled.....	\$.12	\$.30	\$ 1.10
Champion, or Triple Moss Curled. Finely curled deep green leaves10	.25	.75
Extra Double Curled. Not quite as fine as the above.....	.08	.20	.70

Turnip-rooted or Hamburg. Form large roots that are cooked as a vegetable. We have a fine variety called "Thick Sugar" with smooth white roots of the best quality. Far superior to the common variety in both shape and quality10	.20	.70

Hundredfold Pea—Natural Size

PEAS

The very earliest peas like Alaska and Surprise have small pods, but Thomas Laxton Acquisition and Gradus are only three or four days later and have much larger pods. Laxtonian and Hundredfold are two or three days later than Gradus and have larger pods. Little Marvel matures a day or two earlier than Sutton's Excelsior and produces wonderful crops, but the pods are not as large, being about the size of Nott's Excelsior.

Duke of Albany and Alderman are strains of Telephone, but are better than the old type, having darker colored peas and large pods. Heroine is later and has long pods and is very prolific. Prizewinner is a little later than Telephone, has short heavy vines and very large deep green pods, and is one of the best late varieties.

Horsford's Market Garden is a great bearer, but the pods are rather small for market. Long Island Mammoth has very large pods, matures late and is not of as high quality as Telephone, which the pods resemble.

A Valuable New Pea.—Acquisition

This new pea is as early as Thomas Laxton and Gradus and has much larger pods. This makes it a profitable market variety. The vines are 2½ ft. high and produce large crops. See price below.

NOTE—We are now selling peas by weight only. A pound is about 1 pint, 15 lbs. equal a peck and 56 lbs. a bushel by measure. Any quantity over 30 lbs. will be supplied at the 100 lb. rate.

PRIZEWINNER. A new variety of the Stratagem type, but is much more productive. Vines 2½ ft. tall, very sturdy and produce great crops of large deep green pods. A very fine late market pea25	2.70	9.52	17.00
White Marrowfat. Tall, late, large pods. 4 ft.20	2.00	6.72	12.00
Mammoth Melting Sugar. Edible pods, 4 ft.25	3.00

"HARRIS' EARLIEST" SWEET PEPPER

THE EARLIEST AND MOST PROLIFIC SWEET PEPPER

Gardeners who have trouble getting peppers that will produce a good crop of fruit early enough for the Northern States should try **Harris' Earliest**.

"Harris' Earliest" Sweet Pepper (Photograph
Actual Size)

This is by far the **earliest** sweet pepper we know of. The fruit is of good size, resembling the Large Bell or Bull-Nose (but unlike that variety is mild and sweet.) The peppers are bright red when ripe and very firm.

The plants are of dwarf, compact growth and are **literally covered with fruit**, there being often a dozen large ripe peppers on a plant at one time and many green ones.

They can be set out closer together than other varieties and an immense number of peppers are produced on a small amount of land.

It always produces lots of fruit and is so early that the fruit gets ripe long before frost. With this new kind you can get peppers on the market before any other growers have them.

We are improving the size and shape of this pepper every year. It is now **much larger** and of better shape than it was two or three years ago.

Some gardeners tell us that we do not say enough about this pepper. They say they get more peppers from 100 plants than from 500 of any other kind that bears sweet peppers.

Seed of our own growing. $\frac{1}{4}$ oz. 25c; oz. 75c; $\frac{1}{4}$ lb. \$2.75; lb. \$10.00

WHAT MARKET GROWERS SAY

"Harris' Earliest peppers have been a veritable gold mine and I have never been able to make any other variety produce in this locality." L. E. Johnson, Richfield Springs, N. Y., Sept. 21, 1921.

"Your seeds have done the best for me of any I ever bought, but you do not some quite strong enough in your recommends for the peppers. I have picked 18 good sized peppers at one picking from a plant of Harris' Earliest and still left a lot of small ones on the plant. They have got it over any pepper I ever saw for yield and flavor." W. J. Ingersoll, Angola, N. Y., April 7, 1921.

"The Harris' Earliest pepper I got of you is the earliest pepper I have ever seen. At this date, July 24th, the plants are loaded with large fruit and also full of bloom." John H. Withey, Skaneateles, N. Y.

New Yellow Pepper—Oskosh

This is by far the best yellow pepper we have seen. The fruit is large, very smooth, almost round, and the flesh is twice as thick as most other varieties and is remarkably sweet—more so than any pepper we know of. The green peppers are so smooth, firm, and heavy they are most desirable for stuffing.

The plant is very prolific and the peppers mature as early as any of the very large varieties. We advise gardeners to try at least a small quantity this year. Packet 10c; oz. 90c; $\frac{1}{4}$ lb. \$3.50.

MAGNUM DULCE PEPPER

This is the **largest** pepper we know of. It is even larger than Chinese Giant and **much more prolific** and earlier. If you want **big** peppers this is the kind to raise. The fruit is as broad as it is long, has thick flesh and of very mild sweet flavor. The color is deep green turning to red when ripe. Oz. 50c; $\frac{1}{4}$ lb. \$1.75; lb. \$6.50.

PEPPERS

Giant Crimson, Magnum Dulce and Chinese Giant are the largest peppers, but do not bear as well as the varieties with smaller fruit, such as Neapolitan and Harris' Earliest which are also earlier. Of the two, Giant Crimson is more prolific and earlier than Chinese Giant with just as large fruit. Ruby King produces well and is a very large pepper, but somewhat late for the northern parts of the country. Harris' Earliest has fruit as large as Bull Nose and is earlier, more prolific and the fruit is mild and sweet. Of the pungent or "hot" peppers, Giant Cayenne is one of the best.

POTATOES

Disease-Free Seed. "Certified" potatoes are supposed to have not over 5% diseased plants. Our potatoes are raised from seed taken from the best hills only and the crops are carefully inspected and the few diseased plants are at once removed. Some of our crops showed practically no diseased plants at all, being very much better than crops from certified seed in the same field. (See our general catalogue.)

About Shipping.—The potatoes are shipped in sacks holding 150 pounds ($2\frac{1}{2}$ bu.) or barrels holding 180 lbs. (3 bu.) We can usually ship safely by the middle of March, but not before, except to the Southern States. If you wish them shipped in wooden barrels please add 45c to the prices quoted.

If seeds and potatoes are ordered, please state on the order whether the seeds are to be held to go with potatoes, or to be sent at once, and the potatoes later when it is safe to ship them. We cannot safely ship potatoes until the last of March.

Prices subject to change.—The prices here quoted are subject to changes of the market and to our acceptance on receipt of order. Lowest prices will be quoted by letter at any time. Please state the kinds you are interested in.

Varieties.—Of the early kinds Early Six Weeks, Early Ohio and Bliss' Triumph are the earliest and are light pink in color. Irish Cobbler is a very early white potato. Green Mountain is medium late and of finest quality. Golden Rural or Rural Russet is one of the best late varieties.

	Single Bu.	Sack 150 Lbs.
BLISS' TRIUMPH. One of the very earliest varieties and a heavy yielder. The potatoes are round and of a handsome deep pink color	\$ 2.00	\$ 4.50
IRISH COBBLER. The most popular round white early potato. Our stock is very fine, being pure and true to name. Grown from hill-selected seed and practically disease-free.....	2.25	5.00
Irish Cobbler. Second size. All good potatoes for planting.....	2.00	4.25
Early Ohio. The standard extra early potato. Light pink, nearly round with blunt ends. Disease-free seed.....	2.25	5.00

	Single Sack	
Early Six Weeks. Like early Ohio in all respects. One of the very best extra early kinds. Grown from hill selected seed	bu. 150 lbs.	
Early Rose. The old standard early potato	2.25	5.00
Spalding Rose. Large round potatoes of the Rose type. A heavy yielder but a little later than early Rose	2.00	4.50
Green Mountain. A standard late potato of finest quality. Yields well in some localities, notably in New England. Crop inspected and all diseased plant removed	2.00	4.50
NUMBER 9. One of the heaviest yielding late potatoes we know of. Round, white, medium shallow eyes, vines very strong and free from disease. Grown from certified seed and disease-free	1.75	4.00
Heavy Weight. One of the heaviest yielding yet produced. Round to oblong, medium shallow eyes, purple sprouts, pure white skin. Very vigorous grower. Grown from certified seed, disease-free	1.50	3.25
GOLDEN RURAL or RURAL RUSSET. One of the very best late potatoes, almost blight-proof, vines very strong and vigorous and produce immense yields of handsome, round, white potatoes. Disease-free seed from fields that yielded nearly 300 bu. per acre	1.50	3.25
SPORT. A new variety that is practically blight-proof. See our general catalogue for description	1.75	4.50

Note—We can ship potatoes in wooden barrels holding 3 bu. (180 lbs.) if so ordered. The price of a barrel is three times the single bushel price. If the bushel price is \$2.25 a barrel would be \$6.75.

PUMPKIN

	Oz.	$\frac{1}{4}$ Lb.	Lb.
SMALL SUGAR or Pie Pumpkin. Small, round, deep yellow and of good quality. Early and prolific.....	\$.08	\$.25	\$.75
WINTER LUXURY. A little larger than Small Sugar, netted skin, light yellow, and of very fine quality. Keeps well10	.25	.80
Mammoth Potiron, or King of Mammoths. Immense fruit, often weighing over 100 lbs. Color salmon pink, flesh deep yellow. Easily raised and a valuable pumpkin for market or stock feeding15	.35	1.20
Large Cheese. Flattened, ribbed, mottled green and light yellow08	.20	.60
Connecticut Field, or Big Tom. The common yellow field pumpkin08	.20	.55

RADISH

For forcing, Early Scarlet Globe and Harris' Special Scarlet Forcing are the most popular the former is oval in shape while the latter is round. Both grow very rapidly. Crimson Giant Globe is similar to Early Scarlet Globe, but grows larger and requires a little more time to mature.

For the open ground, Early Scarlet Globe is excellent. Earliest Scarlet White Tipped is very handsome and resembles French Breakfast, which is more oval in shape. Icicle is a fine long, white radish, smooth and of fine quality.

Philadelphia White Box is round, grows rapidly and is excellent for forcing and open ground. White Strasburg, Giant White Stuttgart and Delicacy are large, white radishes for summer and fall use.

Winter radishes are sown in July or August and used in the fall and winter. Chinese Rose is the best red variety. Long Black Spanish is also of fine quality.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
Earliest Scarlet Globe Short-leaf. Called also "Red Rocket," "20 Days" and "Startle." Oval shaped, of very rapid growth and good for forcing.....	\$.12	\$.35	\$ 1.25
EARLY SCARLET GLOBE. The most popular variety for forcing and outdoor culture. Oval to round in shape, very bright red, flesh white, firm and crisp. Our seed is very fine.10	.25	.90
CRIMSON GIANT GLOBE. Very large forcing radish. Not so early as Early Scarlet Globe, but larger and stands longer without becoming pithy10	.25	.90
Harris' Special Scarlet Forcing. Round, deep red, small leaves and extremely early. Valuable for forcing and the open ground12	.30	1.00
EARLIEST SCARLET WHITE-TIPPED. (Sparkler) The radishes are round and are white on the bottom and part way up the sides. This is the finest strain of white-tipped radish10	.25	.90
PHILADELPHIA WHITE BOX. A fine pure white, round, or ball-shaped radish for forcing or open ground. The radishes are handsome and of the best quality.....	.10	.25	.90

	Oz.	$\frac{1}{4}$ Lb.	Lb.
DELICACY. A very fine white radish for summer or late fall use. Of globe shape, pure white and of fine quality. One of the best white summer varieties.....	\$.10	\$.25	\$.85
ICICLE. Long, slim, white radish of very rapid growth. The best long white radish for forcing in open ground.	.10	.25	.80
Lady Finger or White Vienna. Long, slender white radish of fine quality. Excellent for forcing and open ground.	.10	.25	.80
Long Scarlet Short Top. Excellent long radish for open ground10	.25	.85
Chartier. Grows 4 to 5 inches long, bright red with white tips10	.25	.90
French Breakfast. Oval, with white tips; early.....	.10	.25	.80
White Strasburg. Large, long, white summer radish.....	.10	.25	.85
Giant White Stuttgart. Very large, round or top shaped white summer radish10	.25	.90

Winter Varieties of Radish

Sow in August and store in moist sand for winter market.

Chinese Rose. About 5 inches long, red skin, with white flesh of best quality	\$.10	\$.25	\$.85
Long Black Spanish. Skin black, flesh white and very solid, 6 inches long10	.25	.85
Black Spanish Turnip. Round or turnip-shaped roots.....	.10	.25	.85
California Mammoth White. Very large white radish; keeps well10	.25	.85

RHUBARB or PIE-PLANT

	Oz.	$\frac{1}{4}$ Lb.	Lb.
Myatt's Linnaeus. Early, large red stalks.....	.12	.30	1.10
Rhubarb Roots. Good roots \$6.00 per 100			

SQUASH—Summer Varieties

The Giant Crookneck, usually sells best in market, although Mammoth White Bush Scallop (called "Cymling" in the South) is in demand in many cities. The fruit is saucer-shaped and scalloped around the edge.

Italian Vegetable Marrow, called also "Cocozelle" (Italian—"Zucchetta nana de Milano"), is now in much demand. The fruit is long, mottled, dark and light green, and grows on a bushy plant without runners. It is used when half grown.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
Early Bush Crookneck. Most popular summer squash. Very early	\$.12	\$.40	\$ 1.10
GIANT BUSH CROOKNECK. Larger than the old Bush Crookneck and equally early12	.30	1.10
Mammoth White Bush Scallop. Large, flat, white fruit....	.12	.30	1.00
Early Yellow Bush Scallop. Similar to the White, except in color12	.30	1.00
ITALIAN VEGETABLE MARROW. Long, mottled green fruit of high quality12	.30	1.10

SQUASH—Fall and Winter Varieties

Boston Marrow and Prolific Marrow are the first to ripen and are excellent for market in the fall, but do not keep as well as the later varieties like Hubbard, Delicious and Quality, which can be kept all winter if put in a dry place where they will not freeze.

The Improved Warty Hubbard grows larger than the true Hubbard, and the shell is covered with lumps or "warts" making a squash that sells well in market, but we do not think the quality is quite as good as the true old Hubbard.

Delicious and Quality are both finer squashes than Hubbard, but do not yield quite as much and are profitable for market only where there is a demand for squash of high quality rather than size and appearance.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
QUALITY. A new winter squash, small in size, but of very fine quality—better than any squash we know of.....	\$.35	\$.70	\$ 2.50
Boston Marrow. Popular fall squash, deep orange color..	.08	.20	.70
Prolific or Orange Marrow. Very similar to above, but of deeper orange color. A valuable squash for fall market	.08	.20	.75
Essex Hybrid. Large, flattened at the ends, thick flesh of high quality15	.40	1.40

SQUASH—Continued

	Oz.	$\frac{1}{4}$ Lb.	Lb.
DELICIOUS. Smaller than Hubbard, but of finer quality	\$.12.	\$.30	\$ 1.25
HUBBARD—True. Smooth, dark green fruit of high quality	.12	.30	1.10
Improved Warted Hubbard. Larger and more warted than the true Hubbard	.12	.30	1.10
Golden Hubbard. Deep orange yellow	.12	.30	1.10
BLUE HUBBARD. A very large squash of the Hubbard shape but the color is blue-gray. The shell is very hard and the squash keep a long time	.12	.35	1.25

SALSIFY or VEGETABLE OYSTER

Mammoth Sandwich Island. The largest and best variety	\$.15	\$.40	\$ 1.50
--	--------	--------	---------

SORREL

Improved Broad-leaved	\$.12	\$.40	\$ 1.40
------------------------------	--------	--------	---------

SPINACH

Photograph showing two rows of King of Denmark Spinach between Victoria and Long Seasons. Note that both the latter have run to seed while the King of Denmark is still in good condition and growing.

KING OF DENMARK SPINACH

Those who have tried this new Spinach know it is a wonderful improvement over all other kinds. It not only grows fast and produces a large yield, but it stands **two weeks** longer before running to seed. The leaves are broad, heavy, dark green, and somewhat blistered like a Savoy cabbage. The remarkable thing about it is that it stands so long before putting up a seed stalk. This is a great advantage to the gardener, as he does not have to sell the whole crop within a few days as with the other kinds.

The King of Denmark spinach resembles Long Season, but grows **much larger** than that variety and stands **ten days or two weeks** longer.

A letter worth reading—from Prof. W. A. Orton, U. S. Department of Agriculture, Washington, D. C., June 17, 1920.

"I write to compliment you on the spinach, King of Denmark which you introduced this year. I find it of very exceptional merit as a long-standing spinach under our spring conditions. Planted March 25th on fairly fertile Norfolk sandy loam it was still in good condition on June 10th when the last was cut, with leaves covering nearly two feet of row, very tender and of superior quality. Two seedlings of Savoy spinach on the other hand have come up and gone to seed during the interval.—W. A. Orton, Pathologist."

Price of King of Denmark Spinach for 1923. **Oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 60c; 10 lbs. or more 55c per lb.**

SPINACH

Norfolk or Bloomsdale Savoy-leaf has deep green blistered leaves, but runs to seed very quickly. Long Season has similar leaves and stands much longer. The new "King of Denmark" is similar to Long Season, but is larger, stands up better and remains without running to seed longer. Viroflay is a very rapid grower and has long, somewhat pointed leaves not as thick as Eskimo, which does not grow quite so rapidly, but stands a longer time and is darker green. Victoria has round, very dark green leaves and stands well without running to seed. For wintering over, we recommend Eskimo, Norfolk Savoy-leaf and Long Season, all of which are hardy.

	Lb.
KING OF DENMARK. Stands longer in hot weather than any other kind. 10 lbs. or more 55c per lb.	\$.60
ESKIMO or GIANT THICK-LEAVED. An improved variety with very large, thick, dark green leaves; grows rapidly and stands well without running to seed. Hardy and an excellent kind for wintering over. 10 lbs. or more, 30c per lb....	.35
VICTORIA. Round, thick leaves, deep green and blistered. An excellent kind for spring sowing. 10 lbs. or more at 30c per lb.....	.35
LONG SEASON. Very deep green, round thick leaves, stands a long time without running to seed. 10 lbs. or more, 35c per lb.40
Giant Crumpled Leaf. Very large rounded leaves blistered or crumpled. Grows rapidly and yields more than most other kinds. A valuable variety. 10 lbs. or more 30c per lb.35
Norfolk Savoy-leaf. Round, blistered leaves, 10 lbs. or more, 28c per lb.30
VIROFLAY. Very large pointed leaves, rapid grower and comes on very early. 10 lbs. or more, 30c per lb.35
Long Standing. Round, deep green leaves. 10 lbs. or more, 30c per lb.....	.35
NEW ZEALAND. Not a true spinach. Valuable for summer. Oz., 10c; ¼ lb. 25c	.80

TURNIPS

Early Milan, both the Purple Top and White, grows rapidly and is the first to mature. The next is Purple Top Strap-leaf, which is very similar but a little later. Purple Top White Globe is a little later but a much better turnip and is the most popular variety for market. White Egg is a handsome white-egg shaped turnip, and Golden Ball a nice, smooth, round, yellow variety which grows rapidly. Snowball is round in shape like Golden Ball, but snow white. Yellow Stone is larger and more flat, while Yellow Aberdeen is globe-shaped and grows to a large size, but is better suited for feeding stock than for market.

	Oz.	¼ Lb.	Lb.
EARLY WHITE MILAN. Very early, flat, white turnip..	\$.12	\$.35	\$ 1.25
EARLY PURPLE TOP MILAN. The earliest purple top turnip, very fine12	.30	1.00
PURPLE TOP WHITE GLOBE. Like Strap Leaf, but round instead of flat. Very fine fall turnip.....	.08	.15	.50
PURPLE TOP STRAP-LEAF. White, purple top, flat, very rapid grower08	.15	.50
Snowball. Pure white, round as a ball; early, with small tops.08	.20	.60
White Egg. Pure white, globe shape08	.20	.60
GOLDEN BALL. Round, smooth, yellow. A fine turnip..	.08	.20	.60
Cowhorn. Long, white, green top08	.15	.45
Yellow Stone. Very firm, round, light yellow, medium early	.08	.20	.60
Yellow Aberdeen. Large, round yellow turnip; very firm and keeps a long time.....	.08	.20	.60

RUTA BAGAS OR SWEDE TURNIPS

	Oz.	¼ Lb.	Lb.
Breadstone. Small, oval, white turnip for table use.....	\$.10	\$.25	\$.90
Macomber. A white purple top Swede of very fine quality for table use25	.75	2.50
PERFECTION SELECTED SWEDE. A fine selected strain of purple top yellow ruta бага. Grows large but is very smooth and of fine grain. The best yellow ruta бага for market08	.20	.65
Imperial Purple Top. Large, yellow, smooth and a heavy yielder08	.20	.60
White Sweet or French. A good White Swede turnip with green top08	.20	.65

Harris' Thoroughbred Tomatoes

We have for years made a special point of raising high quality tomato seed. We raise the seed on our own farm and practice the most careful breeding methods to improve the strains.

Harris' Special EXTRA EARLY Strain of EARLIANA TOMATO

We are quite sure that all our customers who have raised our special strain of Earliana tomato will agree with us that it is the **earliest** and **smoothest** and **best colored** stock of Earliana obtainable. This is a good deal to say, but we have tried all the best strains of Earliana and cannot find one that is quite equal to our own stock either in earliness or quality. There are other tomatoes offered under different names which are said to be earlier than Earliana, but we have found none to be any earlier and most of them are irregular in shape and not colored well.

This special strain of Earliana is not only extremely early (there is no tomato earlier), but the fruit is perfectly smooth, very solid and firm and is well colored right up to the stem. The vines are more vigorous and healthy than most strains of this variety.

Gardeners find this is a most profitable tomato to raise. The early crop brings high prices and the fruit that ripens later is of such good shape and color that it brings almost as much as the later varieties.

We offer seed of our own growing at Moreton Farm. It is Northern Grown as we are on the north border near Lake Ontario. Ounce 40c; $\frac{1}{4}$ lb. \$1.25; lb. \$4.50.

"Your Earliana tomato in field test with Burpee's and Henderson's beat by 3 days, and three days last season meant a profit of 5 to 8c per lb." C. B. Carter, Columbus, Ohio.

"Your seeds proved to be all you claim for them, but your Earliana tomato is surely a winner. Our receipts from one-half acre were \$375.00." F. B. Battersby, Vineland, N. J. Aug. 29, 1922.

"I wish you could have seen our tomatoes while growing. There were no others in the surrounding country near so fine. You must have been careful to have your strains true to name. From Earliana and Bonny Best we had ripe tomatoes much in advance of others around us, and they were certainly fine. The Stone were splendid, but the frost took most of them. Large, smooth, perfect tomatoes, but many did not have time to ripen. In ordinary years the Stone is all right."—W. T. Craig, Limestone, Pa.

JOHN BAER

We have improved our stock of John Baer so that it is now even better than when first introduced. We know of no other kind quite equal to it for second early or main crop.

The fruit is large, smooth, deep red, and colors right up to the stem.

We regard this variety as the best medium early tomato for market or canning.

Seed of our own growing from very choice fruit. Oz. 40c; $\frac{1}{4}$ lb. \$1.10; lb. \$4.25.

"I have grown John Baer tomatoes ever since it was introduced and think more of it each year and I want to say that the seed I got of you last year was the best I ever had. I sold over \$1,000 worth from 2,200 staked plants, and tomatoes were plentiful and very cheap in this section of the country." W. O. Kindig, Medina, Ohio. March 3, 1922.

BONNY BEST TOMATO

This tomato is much like the John Baer. Our selected strain has very smooth, handsome, bright red fruit of good size and well colored.

The fruit does not often crack and we did not see a single one affected with black rot in a large field we had growing at Moreton Farm.

One good point about this tomato which is not possessed by the John Baer is that the stem comes off the fruit when picked, so does not injure other tomatoes when they are packed together.

We are sure there is no finer strain of Bonny Best tomato than the seed we are offering this season. It was saved from very carefully bred plants and practically every fruit was of perfect color and shape. **Oz. 40c; ¼ lb. \$1.10; lb. \$4.25.**

TOMATOES

The very earliest tomatoes are never quite as large and well colored as the later varieties, but Earliana of a carefully selected strain is the nearest perfect of any really early variety we know of. **Harris Extra Early Earliana** is earlier than the old strain, and also colors better. John Baer is about a week later than Earliana, ripening with Bonny Best and has slightly larger fruit than that excellent variety. Chalk's Jewel is a little later and larger. Success is still later and is similar to Stone, but ripens earlier than that variety.

Of the pink varieties, June Pink is the earliest and resembles Earliana, except in color. Early Detroit is a little later, but has large, smooth, well-colored fruit. New Globe is a few days later and the fruit is as round as an apple. Ponderosa is very large, but irregular and does not color well around the stem and is not suitable for market. Trucker's Favorite is large, smooth and matures medium late.

	Oz.	¼ Lb.	Lb.
Extra Early Earliana (Harris' Special Strain.) See opposite page	\$.40	\$ 1.25	\$ 4.50
JOHN BAER. Large, smooth fruit, colors perfectly even bright red all over. Does not crack, very prolific. One of the best second early kinds40	1.10	4.25
BONNY BEST. Very early, large, smooth and bright red with no green around the stem40	1.10	4.25
June Pink. Very similar to Earliana except as to color, which is pink like Beauty35	.90	3.50
EARLY DETROIT. A pink variety with smooth, evenly colored fruit of good size. A very fine pink tomato..	.35	.95	3.75
CHALK'S EARLY JEWEL. Medium early, smooth and well colored30	.80	3.00
SUCCESS. Very fine main crop variety. Smooth, well colored and solid. Seed of our own growing; very fine40	1.00	4.00
STONE. We have a very fine strain of this grand tomato. There is nothing finer than a first-class strain of Stone, but it ripens rather late for the most northern parts of the country. Seed of our own growing at Moreton Farm40	1.00	4.00
NEW DWARF STONE. Plants like Dwarf Champion with fruit like Stone, very prolific and a valuable variety	.40	1.00	4.00

TOMATOES. Ready May 10 to June 15. Strong transplanted, well-hardened plants. Extra Early Earliana, John Baer, Bonny Best, Success, Stone, Dwarf Champion, Early Detroit (pink), Ponderosa (pink)	1.50	13.00
TOMATOES Untransplanted Plants. These are taken direct from the seed bed and should be set in frames and allowed to grow for two weeks or more before setting in the field. They are strong, stocky seedlings 3 to 4 in. high. Ready April 10 to May 15th. Same varieties as named above. Weight packed for mailing 100 1 lb. 1000 5 lbs.50	3.25

HARRIS' FLOWER SEEDS

Fully appreciating the fact that the floral grower is dependent upon the quality of the seed he sows, we are continually putting forth our best efforts to acquire the very best strains and types. Many of these varieties are grown on Moreton Farm where our customers are always welcome to come and inspect our stocks.

The following list is not complete, but it contains those varieties most generally used by floriculturists. For a complete list and descriptions see our general catalog which will be mailed you about Feb. 1st.

Please order by number, as it will help us in filling your order.

Moreton Pink

ASTERS

Every year the increasing demand for Moreton grown Aster seed forces us to steadily increase our acreage of Asters and each succeeding year our Asters are mounting to a higher standard of quality.

All of our seed is either grown on Moreton Farm or very carefully grown especially for us by an expert Aster grower.

Our field of Heart of France, Rochester Lavender, Peerless Pink, Moreton Pink and Ostrich Feather Asters were exceptionally fine this year, and we are offering the best Aster seed that we have ever had.

Queen of the Market

The standard earliest Aster to bloom and on this account often the most profitable to raise for market. It is the most profuse blooming sort and full, double, medium sized flowers are borne on long clean stems. The plants should be started very early in the hot-bed or greenhouse and set in the field just as early as the ground can be worked, because this variety set out later will not produce long stems.

	Tr. pkt.	1/4 oz.	oz.
w1201—White	.15	.30	1.00
w1202—Blush pink	.15	.30	1.00

Crego Asters

This is the large fluffy flower that is so much admired. The fluffy mass of long twisted petals combined with the rich colorings make an aristocratic flower that is the admiration of every one. We have a splendid strain of this type, the plants being especially robust growing. The stems are long and stiff and hold the flowers up off the ground.

American Beauty Asters

The Latest Blooming Aster

This is a new variety from California and is certainly very handsome. The plants are of the branching type, unusually vigorous and produce a profusion of very large full flowers on long strong stems. The flowers have incurved petals making them almost globed shaped. This will prove a very fine aster for cut flowers for nearby market or shipping.

	Tr. pkt.	1/4 oz.	oz.

ASTERS—Continued

Moreton Pink

W1025—Without question this is the finest bright-pink Aster. The color is a deep cerise, like the Paul Neyron Rose, and the only Aster of this color. The flower is of the Rochester or Crego type, very full double, with long twisted petals. This is one of our Moreton Farm specialties and florists are finding it an indispensable variety. Tr. pkt. 20c; $\frac{1}{4}$ oz. 60c; oz. \$2.00.

Ostrich Feather Asters

This a new type of Aster that is proving a remarkable florists' flower. The flowers are much like the Crego, only not so flat. Many of the petals are very narrow and long, giving the flower a feathery appearance that is quite distinct. The flowers are larger than any other variety and the plants are much larger and more vigorous than Cregos. Their season is between Crego and Late Branching, and as only a few flowers mature at a time they carry through a long season.

	Tr. pkt.	$\frac{1}{4}$ oz.	oz.
W1701—WHITE	.15	.45	1.50
W1702—DELICATE PINK	.15	.45	1.50

W1707—CRIMSON	.15	.45	1.50
W1700—MIXED COLORS. A well balanced mixture including all of the above colors	.10	.30	1.00

Lavender Rochester

W1034—There is no better companion to Moreton Pink than Lavender Rochester. It is a remarkably fine clear lavender of the Crego type, but more double and Chrysanthemum-like. We consider this the best lavender Aster. Pkt. 20c; $\frac{1}{4}$ oz. 50c; oz. \$1.75.

Royal Asters

An early Aster to follow up Queen of the Market. The flower and plant resembles the Late Branching in form and size but blooms fully two weeks' earlier. These are the earliest of the large flowering varieties and the earliest variety to do well under the ordinary field treatment given Asters.

	Tr. pkt.	$\frac{1}{4}$ oz.	oz.
W1301—WHITE	.15	.30	1.00
W1302—SHELL PINK	.15	.30	1.00

W1305—PURPLE	.15	.30	1.00
W1300—MIXED COLORS	.10	.25	.85

Heart of France

W1078—There is no Aster of recent introduction that has enjoyed such widespread popularity as Heart of France. It is the best 'red' Aster for cutting and the most popular for the plant trade. The color is a bright garnet-red and the flowers are large and double on tall robust branching plants. Tr. pkt. 15c; $\frac{1}{4}$ oz. 35c; oz. \$1.25.

Late Blanching Asters

The standard mid-season to late variety blooming a little later than Cregos and Kings, and remain in flower a long time, the plants carrying a wealth of bloom until late in the fall. The flowers are very large and have broad incurved petals and show no yellow centers. The plants are of branching habit and carry the flowers on long stems, often reaching two feet high. We offer very fine strains of the most desirable colors.

	Tr. pkt.	$\frac{1}{4}$ oz.	oz.

w1607—Peach Blossom.	.15	.30	1.00
w1600—Mixed colors	.10	.20	.75

Peerless Pink

W1066—Although one of the older varieties, Peerless Pink is still unsurpassed as an all-around dependable Pink. We have an exceptionally good strain of our own growing. The color is a delicate shell-pink, deep enough to have character yet soft enough to be dainty. The very mammoth full double flowers are borne on great long stiff stems that keep the flowers well up off the ground. Its season is just a few days earlier than Late Branching. Tr. Pkt. 15c; $\frac{1}{4}$ oz. 45c; oz. \$1.50.

Sensation

w1059—The only real 'red' Aster on the market. It is a pleasing garnet shade. The flowers are full double of medium size on freely branching plants with good stems. Although coming into bloom quite early it persists until very late. Under artificial light it is especially striking. Tr. pkt. 20c; $\frac{1}{4}$ oz. 50c; oz. \$1.75.

W1000—CHOICE VARIETIES OF ASTERS, MIXED. A very carefully made mixture of the different types and colors. $\frac{1}{4}$ oz. 15c; oz. 50c; $\frac{1}{4}$ lb. \$1.75.

AGERATUM

W2014—BLUE PERFECTION. One of the most satisfactory bedding plants being covered with bloom from early summer until frost. Raised easily from seed sown out of doors or started earlier in a hot-bed or greenhouse. One ounce will sow 800 to 1,000 feet of row. $\frac{1}{4}$ oz. 25c; oz. 75c.

ALYSSUM

A very pretty little plant, covered with pure white flowers, which are produced all through the summer. Especially useful for edging and borders. One ounce will sow 500 feet.

W2021—LITTLE GEM. The dwarf variety for low edgings	$\frac{1}{4}$ oz.	oz.
W2020—SWEET (MARITIMUM). Sweet scented and taller growing	\$.15	.50
	.10	.25

ASPARAGUS

The Asparagus is always in strong demand with every florist.

W2090—PLUMOSUS NANUS. Open-air Seed. The fine leaved variety used with cut-flowers. 30c per 100 seeds; \$2.25 per 1,000 seeds.

W2091—SPRENGERI. The popular variety for growing in hanging baskets, boxes, etc. 15c per 100 seeds; \$1.00 per 1,000 seeds.

BEGONIA

A fine ever-blooming bedding plant for semi-shady positions. Easily grown from seed.

W2130—SEMPERFLORENS, Prima Donna Tr. pkt. 30c; 1/16 oz. \$2.00.

BELLIS Perennis or Double English Daisy

For edging to beds and borders in cool shady places. They bloom very early. The Monstrosa variety does not bloom quite as freely as the other, but the flowers are much larger.

W2140—DOUBLE MIXED. The best quality obtainable of the ordinary free blooming sort	Tr. pkt.	$\frac{1}{4}$ oz.	oz.
W2152—MONSTROSA RED. Mammoth double flowers15	.50	1.75
W2151—MONSTROSA WHITE	\$.20	.85	3.00
W2150—MONSTROSA MIXED COLORS20	.75	2.50

CALENDULA

Calendula are raised for both cut flowers and for the spring bedding plant trade. The orange and the yellow are very desirable autumn colors and will continue to give a wealth of bloom after most other outdoor flowers are gone.

We have, this year, two splendid new Calendulas of our own growing that are far superior to the ordinary strains. They are of larger size, more full double, deeper color, and large vigorous plants. One ounce will sow 300 feet of row.

W2201—ORANGE KING, Harris' Special Deep orange. Oz. 50c; $\frac{1}{4}$ lb. \$1.75.

w2202—LEMON QUEEN, Harris' Special Bright yellow. Oz. 50c; $\frac{1}{4}$ lb. \$1.75.

W2203—PRINCE OF ORANGE. Oz. 20c; $\frac{1}{4}$ lb. 60c.

W2204—SULPHUR YELLOW. Oz. 20c; $\frac{1}{4}$ lb. 60c.

GYPSOPHILA

W2991—ANNUAL BABY'S BREATH. Elegans Alba Grandiflora. A fine flowered form that is splendid to grow for the cut-flower market. The fine sprays of dainty white flowers are always in demand with the florists. One ounce will sow 350 feet of row. Sow at 14 day intervals. Oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.20.

CYCLAMEN

W2490—PERSICUM. One of the choicest of all the green-house or window plants, producing large bulbs in one year from seed. A choice mixture of best colors and the most satisfactory variety to raise from seed Tr. pkt. (about 100 seeds) 50c.

Calendula, Orange King

CARDINAL CLIMBER

W2315—A very popular annual climber which sell well as potted plants. Tr. pkt. 25c; oz. \$2.00.

CARNATION

W2300—GIANT MARGUERITE, Mixed Colors. This is the most desirable sort for outdoor blooming. Seed sowed inside late in winter will produce an abundance of large flowers all summer. There is a large demand every spring for plants of this variety. ¼ oz. 25c; oz. 85c.

CASTOR OIL BEAN

w2500—ZANZIBARENSIS. These make a very good proposition when grown inside in pots until about 6 inches high and then sold with the spring bedding plants to be used for lawn decorations or screens. They are also very effective when the seed is sown out-doors. One ounce should produce 20 plants. Oz. 15c; ¼ lb. 50c.

CANDYTUFT

Candytuft is so easily grown and so universally used by florists that no floral grower should neglect to make successive sowings all summer, while the last sowing in the autumn will produce early spring flowers. One ounce will sow 400 feet.

	oz.	¼ lb.
W2275—GIANT HYACINTH-FLOWERED. An improved Empress with immense spikes of large flowers	\$.40	1.25

AMERICANA or Basket Flower (Harris' Special). The largest of the Centaurea. Grows 4 feet high with large delicately formed flowers 4 inches across. Our own growing.

W2331—WHITE	\$.15	.50
W2334—LAVENDER. A beautiful color15	.50

W2350—GYMNOCARPA or Dusty Miller. This is the finely cut, white-leaved "Dusty Miller" so much used for edging and in porch boxes and vases. Seed sown in January or February will make nice large plants for early spring. ¼ oz. 30c; oz. 85c.

COBEA SCANDENS

W2572—A good blue-flowered vine to grow for the spring bedding plant trade. One ounce of seed should produce 300 good plants. ¼ oz. 15c; oz. 35c.

COLEUS

W2510—EXTRA CHOICE LARGE-LEAVED MIXTURE. Richly colored foliage plants for groups on lawns, ribboning and pot culture. Universally used in porch boxes and conservatory. Easily raised from seed the first season. Our mixture is the best we can obtain. Tr. pkt. 50c.

CELOSIA or Cockscomb

The brilliant colored Cockscomb are becoming more popular for bedding plants and they are a good thing to raise for a plant trade as well as for cut-flowers.

CHINESE WOOLFLOWER. This grows like the Plumed Cockscomb but the heads are more round and fluffy. The most attractive of the Cockscomb.

	Tr. pkt.	¼ oz.
W2362—PINK	\$.25	.60
W2363—CRIMSON25	.60

THOMPSON'S MAGNIFICA (Celosia Plumosa). Tall growing with pyramidal heads of a bright feathery appearance.

W2374—YELLOW15	.50
W2370—MIXED COLORS10	.35

CRISTATA or TRUE COCKSCOMB. The old fashioned low growing cockscomb with the heavy crinkled heads resembling a rooster's comb.

W2380—MIXED COLORS	\$.20	1.00
--------------------------	--------	------

COSMOS

EARLY FLOWERING GIANT. (Harris' Special). We have a large Early Flowering Cosmos of our own growing that is especially fine for our northern climate. We have been growing this for a number of years constantly selecting for true early types with large broad-petalled flowers of good colors. Sown in the open ground in late spring this makes a splendid cut-flower. One ounce will sow 300 feet of row.

W2451—WHITE	1/4 oz.	oz.

W2480—MIXED COLORS	Tr. pkt.	1/4 oz.
	\$.20	.50

W2470—MAMMONT LATE FLOWERING. Mixed Colors. The largest of the Cosmos but very late flowering and must be forced early to get bloom in our northern climate. 1/4 oz. 10c; oz. 30c.

DIDISCUS (Blue Lace Flower)

W2746—COERULEUS. One of the new popular cut flowers. Lavender-blue lace-like flowers on good stems and a profuse bloomer. Tr. pkt. 25c; oz. \$1.50.

DRACAENA

W2750—INDIVISA. The popular center plant for vases, porch boxes, etc. The long, narrow, graceful foliage adds just the right effect. As the seed is sent out in the berry it should be rubbed out before planting. Tr. pkt. 10c; oz. 30c; 1/4 lb. \$1.00.

EVERLASTINGS

These flowers are easily raised and there is often a great demand for them. They are annuals and flower early when seed is sown in the open ground.

HELICHRYSUM or Straw Flowers. The flowers are 2 inches across and are on stems 2 feet long. The most popular "Everlasting."

W3071—SILVER BALL. White	Tr. pkt.	oz.

Large Flowering Heliotrope

LOBELIA

This class of plants is one of the prettiest that can be grown for hanging baskets, porch boxes or edging to the flower bed, and there is always a good sale for the plants. They grow but a few inches high and the dainty, finely cut foliage is dotted throughout the season with an abundance of small blue flowers.

w3300—**CRYSTAL PALACE Compacta.** (True). The finest dark blue for bedding. Tr. pkt. 20c; ¼ oz. 60c; oz. \$2.00.

w3292—**SAPPHIRE** (Trailing). For hanging baskets and porch boxes. Tr. pkt. 15c; ¼ oz. 30c; oz. \$1.00.

MARIGOLDS

Marigolds are a good proposition for the floral grower to raise for either cut-flowers or plants. For cut-flowers, the African varieties are the best. For low borders and edging, use the French Marigolds.

	¼ Oz.	Oz.

For descriptions of named varieties see our General Catalog.

We will be glad to quote you special prices on larger quantities.

PANSY

Pansy—Masterpiece

Each year we are improving the quality of our Pansy seed as we realize the importance of highest quality Seed to the Pansy plant grower and we feel sure that we are offering the highest grade Pansy seed for the lowest possible price.

w3700—**HARRIS' SPECIAL MIXTURE**. This is our own mixture that is especially made up of some of the very best varieties and choicest colors. We make a special point of this mixture as a medium priced mixture for the florists' plant trade. The flowers are all large, many of them ruffled and with bright colors predominating. Tr. pkt. 20c; ¼ oz. \$1.00; oz. \$3.00.

w3704—**"HARRIS' BEST" PANSY MIXTURE**. As the name implies, these are our BEST Pansies. The flowers are extremely large with the deep velvety colors. A large percentage have fluted or ruffled petals. Our price for this quality of Pansies is very low. Tr. pkt. 25c; ¼ oz. \$1.40; oz. \$5.00.

w3702—**MASTERPIECE MIXTURE or GIANT RUFFLED**. The flowers of this mixture have fluted or ruffled petals, which adds much to the beauty of the wonderfully rich colors. This stock may be depended upon to be well ruffled. Tr. pkt. 25c; ¼ oz. \$1.35; oz. \$4.75.

w3701—**GIANT TRIMARDEAU**. Mixed Colors. We make this high grade mixture by mixing together proportionate quantities of choicest colors of the large-flowering Trimardeau Pansies. This assures you of a mixture well balanced as to color and of large flowers. A really good mixture at a low price. Tr. pkt. 15c; ¼ oz. 65c; oz. \$2.00.

SWEET PEAS—Continued

Lavender

w7503—**MARGARET MADISON.** Clear azure blue of large size.

w7506—**WEDGEWOOD.** Mammoth silvery blue and a vigorous grower.

w7515—**HAWLMARK LAVENDER (New).** The purest lavender; A lavender containing no mauve tints. **PRICE** Trade pkt. 25c; oz. \$1.50.

Purple

w7513—**ROYAL PURPLE.** A strong growing rich royal purple.

MIXED COLORS

w7500—Our mixture is made by taking the right proportions of each of the above colors (except 4) and mixing the seed ourselves. In this way you can be assured of a high grade mixture. **PRICE.** oz. 20c; $\frac{1}{4}$ lb. 75c; lb. \$2.50.

GRANDIFLORA SWEET PEAS

w7700—**MIXED COLORS.** For those who want a good mixture at a cheap price we offer this mixture of good Grandiflora varieties. The colors are just as handsome as the more expensive sorts, but the flowers are smaller. Oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 70c.

SCABIOSA (Annual)

The annual Scabiosa are very good to raise for the cut-flower market. They have good, long stems, the flowers of good size and in a splendid variety of desirable colors. They bloom in season for a fall market and are not injured by the first frosts.

ZINNIA

HARRIS' DOUBLE GIANT

The raising of Zinnia seed is one of Moreton Farm specialties and we have worked up a strain of **Double Giant Zinnias** which we claim is the very best. They measure 5 to 6 inches across and are uniformly double. This year we are able to offer only two colors, and you can depend on them being almost 100 per cent. true to color. Each year we find it necessary to raise a larger acreage of Zinnias to supply the increasing demand for Harris' Double Giant Zinnias.

w8104—SCARLET. A deep brilliant scarlet of mammoth size and velvety appearance. Tr. pkt. 10c; $\frac{1}{4}$ oz. 35c; oz. \$1.25.

w8105—YELLOW. A bright, clear, light golden-yellow. Tr. pkt. 10c; $\frac{1}{4}$ oz. 55c; oz. \$2.00.

w8100—MIXED COLORS. Contains a wonderful variety of colors and flowers of largest size. Tr. pkt. 10c; $\frac{1}{4}$ oz. 45c; oz. \$1.50.

LARGE FLOWERING DOUBLE ZINNIAS

This is a strain of California grown seed that is grown for us by a very reliable and careful grower of high grade Zinnia seed, and we assure you they are splendid Zinnias, of large size, true to color, and good double. They are far better than ordinary stock.

MONTBRETIA BULBS

For Cut Flowers

There is no Better Cut Flower Proposition on the Market To-day.

They are the best of the summer flower bulbs for the floral grower, giving a profusion of flowers from mid-summer to late fall. They are new to the cut-flower market and as the bulbs can not be imported, the flowers are sure to command a good price for some time. Handle the bulbs in the same way as Gladioli. We have a large stock of splendid bulbs of our own growing that we are offering at \$6.50 per 100; \$55.00 per 1,000.

SEEDS OF HARDY PERENNIALS

We are large growers of the choicest varieties of hardy perennial plants and seeds and, with very few exceptions, all of the seed offered is of our own growing and all is good fresh seed of the highest germination. The seeds of most perennials do not retain their vitality for very long while many varieties, even at their best, germinate poorly or very slowly, so, for that reason it is best to sow only the freshest and best seed. As we are making a specialty of Hardy Perennial seeds you may feel sure that our seed is the best.

Description of these varieties will be found in our retail catalog as these are the same strains of seeds. If you are interested in Perennial Plants we will be pleased to quote you special prices on such varieties as we have on hand.

- w2008—**AGROSTEMMA** Coronaria. Bright crimson border plant. Tr. pkt. 10c; oz. 30c.
w2025—**ALYSSUM** Saxatile Compactum (Basket of gold.) A fine early yellow for edging. Tr. pkt. 15c; oz. 50c.
w2040—**ANCHUSA** Italica, Dropmore Variety. A rapid growing blue for the shrubbery border. Oz. 25c.
w2045—**ANTHEMIS** Kelwayi. A good yellow for cutting. Tr. pkt. 15c; oz. 50c.

AQUILEGIA. The raising of fine Aquilegia is one of our specialties and we believe we have the finest strain of Long-Spurred Aquilegia on the market.

- w2070—Mrs. Scott Elliott's Long Spurred Strain, Mixed Colors. This is a strain we have been selecting for a number of years and has only the choicest colors and longest spurs. A large yield permits us to sell at this low price. Tr. pkt. 20c; oz. \$1.50.

DELPHINIUM (Hardy Larkspur)

Whether grown for cut flowers or for plants to sell, there is no perennial of so popular demand. For some years we have been giving special attention to the producing of the right kind of Delphinium seed and we are now able to offer three strains of our own growing that we believe can not be surpassed.

w2640—MORETON HYBRIDS. This is a wonderfully fine strain of tall, vigorous growing plants with exceptionally heavy spikes of large double and single flowers. The colors range from single dark blue with white center to double light blue and shell pink. This is an especially high grade article. **Tr. pkt.** 30c; $\frac{1}{4}$ oz. 65c; oz. \$1.85.

w2645—BELLA DONNA. This is the beautiful light blue so much desired as a cut-flower. The flowers, which are distributed so gracefully along the stems, are a very pretty shade of clear turquoise blue. **Tr. pkt.** 25c; $\frac{1}{4}$ oz. 50c; oz. \$1.65.

CHINENSIS. A distinct variety of spreading habit and fine feathery foliage and producing graceful sprays. Will bloom the first year from seed sown outdoors in the early spring.

w4210—RUDBECKIA Newmanii (Black Eyed Susan).....	.30	1.00

Stokesia, or Stokes' Aster

STOKESIA (Stokes' Aster)

w6164—CYANEA, Blue. Stokes' Aster is one of the choicest and most distinct of American hardy perennial herbs. The beautiful light-blue flowers are 3 to 4 inches across and profusely borne in July and August on plants 1 to 2 feet high. It prefers a well-drained sandy loam and is exceptionally drought resisting. It blooms at a time of year when good light blue flowers are very scarce and keeps well in water when cut. $\frac{1}{4}$ oz. 30c; oz. 1.00.

SIDALCEA

w4682—ROSY GEM (Pink). This is one of our new perennials and we feel that it will soon become one of the leading border plants. For this reason it will be well to get stocked up with plants. We have found that Sidalcea seeds only occasionally and this year we have harvested a little seed.

The plant grows about 5 feet tall and during June and July is covered with long, graceful spikes of rosy-pink mallow-like flowers. The shiny dark green foliage are very persistent, making it an excellent border plant. Tr. pkt. 20c; $\frac{1}{4}$ oz. 60c; oz. \$2.00.

w4663—SCABIOSA Caucasica Perfecta (Blue Bonnet). Very handsome lavender flowers that are wonderful for cutting, always bringing a high price. There is always a demand for plants that exceeds the supply	Tr. pkt. 25c	.85	3.00
w4670—SHASTA DAISY Alaska. Good cut flowers for late summer market and the plants always find a ready sale.....		.60	2.00
w4610—SALVIA Azurea Grandiflora (Hardy Salvia).....		.45	1.50
w6179—STATICE LATIFOLIA (Great Sea-Lavender). A most valuable "Everlasting" flower. The large sprays of tiny blue flowers will keep for months after being cut and dried.40	1.25

SWEET WILLIAM. The improved large-flowering varieties of Sweet Williams make a wonderful display of color in the garden and plants are always in demand. In the spring the flowers sell well for cheap bouquet work. They are so easy to raise that they are profitable to sell to a cheap market.

w6131—WHITE.15	50
w6132—NEWPORT PINK. Clear salmon pink.20	60
w6133—SCARLET BEAUTY. Intense scarlet.20	60

w6130—PERFECTION MIXED. All colors.....	.10	30

w8044—VEBONICA Spicata (Speedwell). A showy, free-flowering blue perennial bearing in June and July, long racemes of small blue, feathery flowers Tr. pkt. 15	40	1.50
---	----	------

GLADIOLI

There is no more popular flower to raise for cut-flowers than the **good varieties** of Gladioli. This list is very carefully selected from the innumerable varieties on the market and represents the most desirable sorts that can be offered at a moderate price. All bulbs are at least 1½ inches in diameter.

For more complete descriptions, and for descriptions of other especially fine sorts not listed here, see our General Retail Catalog. We have a number of second size bulbs (1 in. to 1½ in.) of many of these varieties on which we will be pleased to quote you special prices on larger lots.

DE LUXE MIXTURE OF PRIMULINUS HYBRIDS. An especially high grade mixture made up of named varieties.....	.70	5.00

Insecticides and Fertilizers

ARSENATE OF LEAD. We find this a much better and cheaper poison than Paris green for use on potatoes, apple trees, etc. It is in paste form and should be applied with water, using 1 lb. to 20 gals. of water. **Paste** 1-lb. can 30c; 12½-lb. pails \$1.90 each; 25-lb. pails \$3.50; 50-lb. can \$6.50; 100-lb. can \$12.00. **Powder**—1-lb. can 35c; 5-lb. cans \$1.25; 12½-lb. pails \$2.75; 25-lb. pails \$5.25.

TOBACCO DUST. Tobacco dust is an excellent material for keeping bugs off cucumber, melon and squash vines. The dust should be applied when the leaves are wet so that it will adhere to them. It should be used in liberal quantities. **For fumigating greenhouses** the tobacco dust we sell is most excellent. It burns evenly and will light without the use of kerosene. 5 lbs. will fumigate a house 20 x 100 feet. 5-lb. package 50c; 10-lbs. 75c; 50 lbs. or more at 6c per lb.

FORMALIN (Formaldehyde, 40 per cent). A valuable disinfectant for destroying germs that cause diseases in plants. It is very effective when used to destroy smut germs in oats and scab on potatoes. To treat oats use 1 pint formalin to 50 gallons of water and soak ten minutes. For potatoes use 1 pint to 30 gallons and soak two hours. **Pint 50c; quart 75c; gallon \$2.40.** Cannot be sent by parcel post.

SULPHO-TOBACCO SOAP. For killing aphids or lice on roses and other plants we have found nothing so effective and convenient as Sulpho-Tobacco Soap. Directions for use are printed on the cover of each cake. A 3-oz. cake makes 1½ gallons and an 8-oz. cake 4 gallons of the solution. 3-oz. cakes 10c; 8-oz. cakes 20c.

WHITE HELLEBORE. The best remedy for currant and cabbage worms. Apply dry or in water. **Per lb. 65c.**

BUG DEATH. A well-known insecticide. It is a fine powder and may be applied with a duster or in water as preferred. 1-lb. package 25c each; 5-lb. package 75c each; 12½-lb. kegs \$1.75 each.

LAMBERT'S DEATH TO LICE. This is the most effective remedy for killing lice on poultry we have found. Death to lice is a powder and is easily applied to the fowls by dusting it through the feathers. It kills the lice within a few minutes after applying. 15-ounce cans 25c. Full directions for use are printed on each can.

NITRATE OF SODA. This is the most soluble and quickly available form of nitrogen or "ammonia." It is of great benefit in forcing a strong luxuriant growth in plants. It is especially valuable for cabbage, cauliflower, beets, carrots, celery, spinach, onions, tomatoes, potatoes and similar crops, as well as for grass and grain. It can be advantageously used as a top dressing after plants are up. It is immediately available to the plants when applied.

Gardeners should always have some nitrate of soda on hand and use it whenever they want to promote a quick, strong growth in plants. A little nitrate dissolved in water at the rate of about a tablespoonful (1 oz.) to 2 gallons of water will stimulate a rapid growth either when applied to plants in frames, greenhouses or the open ground. If your plants don't grow well, try a little nitrate on them—but don't use too much. 10 lbs. 65c; 50 lbs. \$2.75; 100 lbs. \$4.75; bag (200 lbs.) \$9.00. Prices subject to change.

BONE MEAL. One of the best fertilizers for garden crops. The meal we offer is finely ground raw bone containing 4½ per cent. Ammonia or Nitrogen and 50 per cent. phosphate of lime equivalent to 24 per cent phosphoric acid. 100 lbs. \$4.00; bag, 167 lbs. \$6.00.

Protect Cabbage Plants from Maggots

The most effective way to keep early cabbage and cauliflower free from maggots at the roots appears to be the tar-paper pads or discs, which have been used for some years on Long Island with excellent results.

The eggs which produce the maggots are laid on the stems of the plants by a little fly about the size of the common house fly. When the eggs hatch the young maggots crawl down to the roots and there eat the stem until the plant dies, or is badly injured.

It has been found that small discs or pads made of tarred paper placed around the stem of the plant when set out prevent the fly from laying the eggs on the stem and thus save the plant from injury.

The New York State Agricultural Experiment Station issued a bulletin some time ago referring to experiments made with different methods of protecting plants from the maggots. According to this report the tar-paper pads proved by far the most effective method of treatment.

How to apply the tar pads. By means of a slit the pad is slipped around the stem of the plant, the center of the pad being also slit cross-ways bends down and fits closely around the stem.

Apply the pads the same day the plants are set out. If this work is delayed for a few days it gives the flies a chance to deposit their eggs.

Price of Tar-Paper Pads: 100, 40c; 1000, \$2.25; 5000 or more at \$2.00 per 1000.

Harris' Seeds for Market Growers

OSTRICH FEATHER ASTER

A new strain with large flowers and very long stems. See page 36

JOSEPH HARRIS CO., *Seed Growers*
Moreton Farm COLDWATER, N. Y.
